Moqui's Pueblo Agency,
Arizona June 15th, 1881

Honorable Commissioner Indian Affairs
Washington
D.C.

I have the honor to renew my application for funds for the purpose of sinking a Well and the erection of a wind mill in the Valley for the use of the Moquis people.—

As advised by Department letter of March 14th 1881. Marked "F. Arizona letter 670- 4434"

These people absolutely require a better supply of ~~xxxx~~ water for all purposes. they would plant more if irrigation was possible. which would increase their Crops, and just in that proportion they would Contribute to their own support, and thus reduce their Calls upon the department for supplies. I believe Water Can be

Sullivan, 2

Obtained in many locations not far below the surface, and the success of wells and windmills, would be one of the means of inducing them to leave the mesa and go to the valley where they should be induced to go.

I think I can pay the Indian labor with goods in part if not entirely on this job.

The result of my investigation of the various wind mills, is that the "Iron Duke" made and Soldat Indianapolis Ind is the best on the market. it is made of Iron entirely, making it more durable and less liable to be affected by wet or dry, cold or warm weather and much more durable. While it cost 25 to 50 dollars more than other patterns, I regard them preferable.

I have the honor to be your most Obt

John A Sullivan
