The Commissioner

of the General Land Office.

MAY 26 1914

My dear Mr. Tallman:

A reservoir and dam are now being constructed at Ganado on the Navajo Reservation in New Mexico, to irrigate about 2,000 acres for Indian allotment purposes. Ganado is located about 70 miles by road in a northwesterly direction from Gallup, New Mexico, and about 29 miles almost due west from Fort Defiance.

This Office would be pleased to have the irrigable area surveyed at an early convenient date into 10-acre tracts, with such meandering of roads, canals, and ditches as may be required.

FILED BY M. P. J.

This matter has been gone over informally with Topographer Dunnington, and it is suggested that he be instructed to confer and to cooperate with the field officers of the irrigation branch of the Indian Service with the view to adjusting the survey lines to the roads, canals and ditches.

It is requested that the expense of this survey be paid from the money already segregated for the use of your office in Indian field survey work.

Very truly yours,

(Signed) E. B. Meritt

Assistant Commissioner.
