Special Commissioner to
Negotiate with Indians

Santa Fe, New Mexico
April 21, 1932

Hon. Chas. J. Rhoads,
Commissioner of Indian Affairs,
Washington, D. C.

My dear Mr. Commissioner:

May I ask that the enclosed photographs taken by me at Leupp be inserted as exhibits in my letter of April 9 written from Winslow reporting on the flood conditions at Leupp.

The first photograph shows one of the six or seven cuts in the main dike toward the southerly part of the dike. The second shows a close-up of the embankment or dike at onee of these cuts. By this it will appear how the river eats away the dirt in the embankment. It really is no dike at all as far as effective protection is concerned.

The third photograph shows the most northerly of the breaks in the dike and the conditions adjacent to it on that date. By this it will appear that even if they had a drag line available there at this time, that it would be almost impossible to put it to work at this location now. However, I believe further expenditure of money to save this plant will be a waste.

Respectfully yours,

H. J. Hagerman
Special Commissioner
