Instructions.

Mr. Frederick Garing, Farmer.

You are hereby placed in charge of the school farm and orchard at Tuba, and all stock and other property pertaining to your work. you will retain possession of the blacksmith and tools until the arrival of the mechanic. Have a place for all implements and insist on their being returned there after being used.

Every thing in your line should be an object lesson to the Indians Submit plans for successfully irrigating the orchard with the least amount of water, together with the material and Indian labor needed. The mule team will be reserved for school use but you may have your choice between Roxy and Brewny and Dandy and George.

Have a detail of school boys to assist in the chores, with Shoie to interpret and assist also. Do not permit any one to abuse stock under your care. When other employees come you will have more help. Have school boys to feed the school slop to the school pigs, but see that they do it properly. Instruct them in the proper care of the different animals belonging to the school, as well as in the car of fruit trees and in the raising of the different crops under cultivation. Mr. Feares is detailed at the school, so these instructions go into effect today. You will be expected to do a certain amount of experimental work, and to keep a record of results.

It is my wish to obtain the best results at a minimum expense. Keep an accurate account of all fruit and vegetables and other farm products furnished the school, as well as of that otherwise disposed of.

Permit no waste or extravagance of any kind; while we are here as representatives of a rich govern ment, we are also here to teach a poor people how to make the most of a hard lot, and it is only by the practice of the most rigid economy, that they will ever succeed, in gaining a comfortable livelihood; economy should therefore be our aim in every thing.

Very respectfully,

[illegible]

Superintendent
