Mr Mc Crey
Supt. N. Navajo Agency
Shiprock, N.M.

Dear Sir;

This refers to water development program on your reservation.

It is our intention to benefit by all the advice and other information that it is possible to get from not only the Superintendents, but their Stockman and Chapter heads, or other field men as to locations of reservoirs, springs, dug wells, etc. to be developed.

It is requested that above mentioned men be ready to offer any recommendations in locating reservoirs etc, as I will call in person or have some one call in person to commence reservoir construction with Indian teams as soon as it is considered the teams are in condition to do a days work, and in the mentime if possible in accordance with the suggested locations, we will stake out reservoirs, set posts, determine heights and widths of reservoirs, and also stake out proper dimensions of Spillways to take care of flood water.

I will be glad if each stockman and field man would investigate his district, and call our attention to any reservoir site worthy of investigation.

Very truly yours

A. H. Nomack
