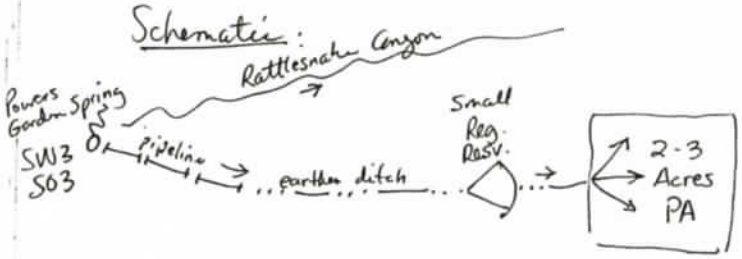
RE: POWERS GARDEN ADMIN. SITE & ASSOC. FILINGS, ETC.

DATE: 20 JUNE 1991

Phone conversation w/ USFS - Coronado (Supervisor's Office in Tucson), Bob Lefevbre, revealed the following info about the Powers Garden Admin Site:

1) Approx 2-3 acres of native pasture is irrigated utilizing surface water diverted from Powers Garden Spring (SW3) in Rattlesnake Canyon. The MOC is a pipeline from spring box which empties into an earthen ditch through a small earthen regulatory reservoir. During periods of irrigation (rare) the water is physically diverted onto the field and wildflood the pasture.

Schematic:



(Cont.)

2) Regarding Mike Isley; he sold the ranch and gave up the grazing allotment in 1982. The current lessee is "Deer Creek Ranch" c/o Anthony Lunt, P.O. Box 842, Safford, AZ ~~85448~~ 85548

3) This site is utilized sporadically at best, and generally only by the grazing permittee in the course of checking on his stock.

4) Recommend making a brief mention of this situation in the special report, but <u>not</u> field investigating this site.
