Inspection Deer Creek 1956

10/15 - Rode E side of allot. Gap spr. - Bluff spring, lower S.E. portion of allot - Dry feed fair - distribution good utilization light - Cattle on it now but haven't been -

10/16 - Deer Creek Ranch to Kennedy saddle to Corral spr Down corral canyon to Rattlesnake to well - Then to ~~Sycamore~~ Kilbury dam - West toward Grassy ridge from Cabins - then to R.S. Cabin

Kilbury dam needs cleaning out - Pete is going to do it -

Found tank site in Douglas Canyon - mouth -

Rattlesnake canyon bottom shows use other parts of area covered with dry feed show little use -

Water is problem - wells nearly dry -

10/17/56 - F.S. Cabin rattlesnake up mail box canyon to mail box pump (well) - then saddle pipe stem to Juniper spr - up Pipestem to saddle then down canyon to Rattlesnake & return to Cabin -

Juniper spr needs pipe lowered & new storage trough

area around spr. 90% utilization

area head of Pipe stem not used - will be used if we have winter moisture as cattle will then stay in area -

10/18 Cabin rattlesnake up Horse canyon to saddle to Sycamore Canyon to Coms dam - good development little water - then to Mud spr - spring has been worked over - excellent job

Area at mud spr - shows 85% utilization

Hill side etc show little use in Horse Canyon etc
