MEMORANDUM TO SUPERINTENDENTS: *Summary of status*

Reports received in this Office in response to memorandum from this office, dated September 4, 1934, relative to a monthly statement showing the balance of E.C.W. funds at the close of the business month; indicate that a few Agencies have encumbered their E.C.W. funds in the amount of the estimated cost of drilling and equipping the water wells planned on your E.C.W. program. Other Agencies have indicated that they are expecting additional funds with which to carry on their drilling program.

Please be referred to Office Circular Letter No. 99 of July 23, 1934. This Circular states in part as follows--"Begin this work without delay, but report to this Office the location and number of proposed wells and money diverted."

The Coordinating Office would like to have a copy of your letter to the Office in which you have reported the money diverted.

Very truly yours,

D. E. Harbison

D. E. HARBISON
Acting Production
Coordinating Officer
