got under headway and to ascertain how their land was
As will be seen by the accompanying plat their
lines is not in harmony with the Government survey
but I thought I could adjust it to the survey afterwards
after ascertaining the lines claimed by them to enclose
their land & we then located the land by ascertaining the
Location of part of sections bearing the Government
Corner Stakes adjoining them claiming up to the
Corners marked for the Indians, all the land
marked shows what is claimed by the different
families - Of course these people are all Moquis
and belong to the same Mesa and Village (the Walpi)
but are divided into numerous clans each having
a representative name such as the Snake, Eagle
Antelope - Corn, Squash, Rain people, Coyote, &c
The Boundary of land claimed by the Snakes is cul-
tivated jointly by them and the productions thereof
divided equally among them of that name
the same with the Eagle family and so on -
In thinking the matter over it has oc-
curred to me that it would be the best plan to
give to each of the Snakes as far as it would go 40 acres
each so that each family would get a piece of the

then consent the work can be accomplished
with little or no bad feeling.

The French Village people who are called Tobacco people do consent to exchange their lands for the lands that are now occupied by Present one

[illegible] to take the three thousand
Pounds spread the general declaration planned by them
upon subject to the outside boundaries to
which each may be legal entitled in any
Case that is at issue until taken. A Bank or
Judge by full Power and of Authority can divide
the Lands among them to the best of their ability
so that they have equal advantages as to Character
and other privileges. Keep the French Burgess's
Grant of land situated at the foot of the Mesa where
there is now standing left hand called so that it can be
called French Village. This can be done easily as
a Village is the only with and may be called
French Village No 1 on the left hand. Another Village

latitude about 6 to me - I think the rides a poor
one for when they come off the river they will
naturally have to cheat on gauges where they can
