Claimant contends the water pumped by this well is percolating groundwater. Thus, it is not public waters and is not subject to appropriation. However, without prejudice to its position, claimant is filing this statement of claimant form to protect its right to divert these waters should it ever be determined that some or all of the water tapped by this well is in reality subflow of the San Pedro River. Claimant and its predecessors in interest have irrigated and used water for beneficial purposes on these and other nearby lands since prior to 1919.
