

MEMORANDUM FOR ASQH-DEH-B, Ms. Cottrell

SUBJECT: Review of Jackson Research Project - A Century of
Development and Changing Missions, 1877-1977

1. A review of subject report was accomplished by this office. A listing of changes is enclosed for your information.
2. The simple method of parenthetical citation in the text is now preferred by both the Modern Language Association (MLA), 1984 revision, and the American Psychological Association (APA), 3d edition (1983) (APA method is usually used by social and natural science affiliates.) For this reason, I would suggest the MLA method be used throughout the report, other than where the footnote presents further supporting text. Let's get a 1990's quality report, its going to be around for a long time.
3. Committed to Service.

MICHAEL M. SHAUGHNESSEY
Realty Specialist
