Footnotes

- ¹ Consumptive use for individual users may not cover an entire 5 year period, the average shown is based on the years of record.
- ² In 2003, the United States Bureau of Reclamation (Reclamation) began deducting unmeasured return flows from the diversions by individual divertors. Prior to this time, Reclamation only deducted the total amount of unmeasured return flow from the total Lower Basin diversions.
- ³ The entitlement amounts do not include 72,000 acre-feet for the Ak-Chin (50,000 acre-feet) and Salt River-Pima Maricopa Indian (22,000 acre-feet) water rights settlements, which is delivered by the Central Arizona Project to reservations.
- ⁴ The Imperial National Wildlife Refuge spans the Parker and Lower Gila basins. Consumptive use has been prorated based on the percentage of the Refuge land area in each basin.
- ⁵ The Wellton-Mohawk Irrigation and Drainage District (IDD) spans the Lower Gila and Yuma basins. Consumptive use has been prorated based on the percentage of the Wellton-Mohawk IDD land area in each basin.
