I. Hopi Claims to Off-Reservation Water Supplies 12

I. INTRODUCTION

The Hopi Tribe submits this supplement to its Third Amended Statement of Claimant supplementing its original Statement of Claimant, filed November 3, 1986, its Amended Statement of Claimant, filed January 29, 2004, its Second Amended Statement of Claimant, filed November 12, 2009, and its Third Amended Statement of Claimant, filed June 2, 2015. The Hopi Tribe reserves the right to further amend or supplement its Statement of Claimant.

On June 29, 2015, the Arizona Department of Water Resources ("ADWR") emailed the Hopi Tribe and the United States on behalf of the Hopi Tribe to clarify questions ADWR had in relation to the Third Amended Statements of Claimant filed by the Hopi Tribe and United States Claim on behalf of the Hopi Tribe. On August 24, 2015, the Hopi Tribe received ADWR's Second 120-day Notice of Intent to File Final Hydrographic Survey Report for the Hopi Indian Reservation. ADWR provided notice pursuant to Pretrial Order No. 6 and A.R.S. § 45-254 that it planned to file the final hydrographic survey report on December 18, 2015. Pursuant to A.R.S. §45-254(E)(1), the Hopi Tribe now submits this supplement to the Hopi Tribe's Third Amended Statement of Claimant. This supplement incorporates all claims made in the Hopi Tribe's Third Amended Statement of Claimant and only revises those claims specifically discussed below.

In submitting this supplement to its Third Amended Statement of Claimant ("3rd Amended SOC"), the Hopi Tribe does not waive its sovereign rights to the land and resources of the Hopi Reservation or to other lands and resources owned by the Tribe. The Hopi Tribe does not waive its right to change the use of its water rights or to seek confirmation of additional water rights if the need for more water arises in the future. The Hopi Tribe reserves right to administer its

own water code, and in filing this statement in no way submits to the jurisdiction of the State of Arizona as to the control and administration of water decreed to the Hopi Tribe.

II. Hopi Water Rights Claim

A. Hopi Tribe Claim Summary[1]

Table 1 -- Quantification

Use	Quantity (Acre-Feet per Year)
Domestic, Commercial, Municipal and Industrial Use	9,348
Agriculture	
- Past and Present Irrigation	102,303[2]
- Livestock	1,000
- Ceremonial and Subsistence Irrigation	7,385
- Water Storage	6,184
Present Mining Use	1,255
Energy Resources Development	27,600
Tourism	1,022
Recreation	41
Other Claims	
- Subsurface Mineral Rights	40,295

[1] The table is a summary for convenience and does not limit the broader claims made in the text above, *e.g.*, relating to the ownership of water resources as a whole; nor does the table limit the more precise description of each category that follows. This table does not include claims for water off the "main reservation" per ADWR.

[2] The Hopi Tribe also claims 333 acre-feet for irrigation storage plus evaporation and seepage losses.

- Aesthetic, Cultural and Ecological Flows - A) Pasture Canyon - B) White Ruin Canyon - C) Lower Little Colorado River (instream flows)	>310[3]
- Cultural, Religious and Ceremonial Uses	
Total	196,743

B. **Domestic, Commercial, Municipal and Industrial Use (DCMI)**

1. **Future DCMI Uses**

The Hopi Tribe is not supplementing its claim for Future DCMI uses. Please see the Hopi Tribe's 3rd Amended SOC for this claim.

2. **Existing and Future Wells**

The Hopi Tribe is not supplementing its claim for Existing and Future Wells. Please see the Hopi Tribe's 3rd Amended SOC for this claim.

3. **Springs**

The Hopi Tribe is not supplementing its claim for Springs. Please see the Hopi Tribe's 3rd Amended SOC for this claim.

C. **Agricultural**

1. **Past and Present Irrigation**

The Hopi Tribe supplements its Past and Present Irrigation claim and now claims the right to irrigate an additional 311 acres requiring a diversion of an additional 1,182 acre feet per year to irrigate this land. With the addition of the acreage and water diversion, the Hopi Tribe now claims the right to irrigate 26,922 acres of land that has been irrigated in past or is irrigated presently. This

[3] The 310 acre-feet per year represents the quantification to protect the flows at Pasture Canyon and White Ruin Canyon Wash.

acreage requires a total diversion of 102,303 acre-feet of water on an average annual basis to irrigate the lands shown in Appendix 1.

The Hopi Tribe's newly claimed acreage arose from the Tribe's examination of new aerial imagery to respond to ADWR's June 29th email.[4] The new aerial imagery[5] provides the basis for the addition of a new category to the past and present irrigation (HIA) previously identified in the Hopi Tribe's 3rd Amended SOC.[6] The Hopi Tribe's newly claimed acreage is that portion of the acreage identified in the new aerial imagery that does not overlap with the 3 HIA categories the Hopi Tribe previously claimed in its 3rd Amended SOC. The Hopi Tribe divided the newly claimed acreage into two subcategories (recent and present irrigation), with totals of 138.3 acres recent and 172.7 acres present. The Tribe claims these acres as well as the additional 1,182 acre-feet per year necessary to irrigate this land. These changes are reflected in Table 2 below and in Appendix 1. The sources of water for this claimed irrigation remains unchanged from the 3rd Amended SOC.

---

[4] This additional irrigated acreage is limited to irrigated areas discovered while attempting to resolve ADWR questions on impoundments and is not based on a complete search for all additional acreage across the entire Reservation.

[5] The Tribe digitized this new acreage from 2010 Bing aerial imagery obtained via GIS.

[6] In the attached Appendices, the Tribe renamed the 3rd category of Historic Irrigated Acreage "HIA Project DW 10." This renaming allows the exhibit text to be more consistent with the irrigation claim text and to differentiate it from the newly added 4th category described herein. The acreage amount in the 3rd category did not change.

Table 2 -- Past and Present Irrigation Acreage and Average Annual Diversion Volume

Category	Acres	NIR (ft)t	Overall Irrigation Efficiency	Water Duty, ac.-feet/ac (rounded)	Avg. Ann Div. Vol, acre-feet (rounded)
U.S. Third Amended Claim	13,031.6	2.09	55%	3.80	49,520
ADWR Complete Evidence not within the U.S. Claim	1,853.3	2.09	55%	3.80	7,043
ADWR Partial Evidence not within the U.S. Claim	11,658.5	2.09	55%	3.80	44,302
Historic project DW 10	67.5	2.09	55%	3.80	256
Additional HIA from New Aerial Imagery, Current irrigation	172.7	2.09	55%	3.80	656
Additional HIA from New Aerial Imagery, Recent irrigation	138.3	2.09	55%	3.80	526
Total	**26,921.9**				**102,303**

2. **Livestock**

The Hopi Tribe is not supplementing its claim for Livestock. Please see the Hopi Tribe's 3rd Amended SOC for this claim.

3. **Ceremonial and Subsistence Irrigation**

The Hopi Tribe is not supplementing its claim for Ceremonial and Subsistence Irrigation. Please see the Hopi Tribe's 3rd Amended SOC for this claim.

4. **Water Storage**

The Hopi Tribe re-asserts its claim for 4,883 acre feet for stockponds and supplements its claim with an additional 1,301 acre-feet per year for additional impoundments, including those previously claimed by the United States on

behalf of the Hopi Tribe and previously unclaimed impoundments.[7] The addition of the above-identified impoundments increases the Hopi Tribe's claim for impoundments to a total quantity of 6,184 acre-feet per year for water storage.

The Hopi Tribe's supplemental claim arose out of ADWR's June 29th impoundment questions regarding the discrepancy between the impoundments claimed by the Hopi Tribe and the United States for the benefit of the Hopi Tribe. The Tribe previously claimed 608 impoundments in its 3rd Amended SOC and the United States claimed 1,001 impoundments. The Hopi Tribe and the United States determined that they each relied on different definitions of the word "impoundment", and that difference lead to the discrepancy between the two claims. For example, the Hopi Tribe only claimed impoundments used for stockwater in the Tribe's 3rd Amended SOC, whereas U.S. experts claimed any impoundment verified, even if the use was for purposes other than stockwater. The Hopi claim for stockwater impoundments from its 3rd Amended SOC, therefore, is generally a subset of the United States' claim as approximately 600 of the Hopi impoundments claimed are also part of the United States' Claim for impoundments for stockwater use.

After evaluating the additional impoundments claimed by the United States, the Hopi Tribe now supplements and corrects its previous impoundment claim as follows: A) addition of impoundments included in the United States' Third Amended Statement of Claimant that were not included in the Tribe's 3rd Amended SOC; B) addition of impoundments that were not previously claimed by either the Hopi Tribe or the United States on behalf of the Hopi Tribe; and C)

[7] The Hopi Tribe is not supplementing its claim for irrigation reservoir storage or its claim for evaporative losses as previously claimed in the Hopi Tribe's 3rd Amended SOC.

corrections to location information for impoundments included in the Hopi Tribe's 3rd Amended SOC.

a. **Impoundments Claimed by the United States on Behalf of the Hopi Tribe**

The Hopi Tribe supplements and corrects its claim for impoundments from its 3rd Amended SOC to include all impoundments claimed by the United States on behalf of the Hopi Tribe. The Hopi Tribe now adopts the United States' broader definition of impoundment. The Hopi Tribe claims the additional 396 impoundments claimed by the United States and submits Appendix 2 with the location of all claimed impoundments and Appendix 3 mapping all claimed impoundments. These appendices replace exhibits previously submitted with the Tribe's 3rd Amended SOC. The 396 impoundments added from the federal claim are listed separately in Appendix 2 and differentiated in Appendix 3 by including "FC" in front of the identifier from the federal claim (FC). The addition of these impoundments claimed by the United States adds 1,289 acre-feet per year to the Tribe's water storage claim.[8]

b. **Addition of Previously Unclaimed Impoundments**

The Hopi Tribe relied on more recent digital aerial photography to respond to ADWR's June 29th impoundment questions. During the Hopi Tribe's review of the more recent digital aerial photograph, the Hopi Tribe identified 8 impoundments previously unclaimed by either the Hopi Tribe or the United States. The 8 previously unclaimed impoundments are listed separately in Appendix 2 and differentiated in Appendix 3 by including "PUI" in the label. The

---

[8] FC I0411, an impoundment claimed in the Pasture Canyon area, appears to duplicate amounts previously claimed by the Tribe in its 3rd Amended SOC.

Hopi Tribe claims these 8 previously unclaimed impoundments and the additional 12 acre-feet per year as a part of the Hopi Tribe's water storage claim.

c. **Corrections to Locations of Certain Impoundments**

The Hopi Tribe supplements and corrects the location for 91 impoundments included in its 3rd Amended SOC because those impoundments had incorrect locations. This error resulted from the Hopi Tribe's use of both the North American Datum (NAD) of 1927 (NAD 27) and the North American Datum of 1983 (NAD 83) in the geographic information system (GIS) used for preparing exhibits for the claim. Appendix 2 provides a table with the correct location for the 91 impoundments and Appendix 3 is a map of all impoundments with the corrected locations incorporated. The revised locations rely on NAD 83 and the Hopi Tribe now projects these impoundments to Universal Transverse Mercator (UTM) Zone 12 North.

Subject to the total quantity of rights asserted herein, the Hopi Tribe claims a right to repair, to maintain, and to replace existing impoundments. The Hopi Tribe also claims a right to construct new impoundments in the future for livestock water and soil and water conservation benefits as needed to satisfy the livestock demand of 1,000 acre-feet of water per year.

D. **Energy Resources Development**

The Hopi Tribe is not supplementing its claim for Energy Resources Development. Please see the Hopi Tribe's 3rd Amended SOC for this claim, including present mining, future mining, and future energy resource development.

E. **Tourism**

The Hopi Tribe is not supplementing its claim for Tourism. Please see the Hopi Tribe's 3rd Amended SOC for this claim.

F. **Recreation**

The Hopi Tribe is not supplementing its claim for Recreation. Please see the Hopi Tribe's 3rd Amended SOC for this claim.

G. **Other Claims**

1. **Subsurface Mineral Rights**

The Hopi Tribe re-asserts its right to its proportional share of the water in and feeding Blue Springs under 25 U.S.C. §640d-6 (Navajo Hopi Land Dispute Settlement Act of 1974 or the "1974 Settlement Act"). The Tribe re-asserts its claim of 40,295 acre-feet of water annually for the Tribe's proportional share of the Blue Springs complex.

On June 29, 2015, ADWR requested clarification as to whether the Tribe's claim to Blue Springs is a consumptive use claim or for instream flow maintenance. The Hopi Tribe's claim to Blue Springs is both for instream flows and consumptive use. The Tribe asserts the right to transfer its Blue Springs' water rights for consumptive or non-consumptive purposes.

2. **Aesthetic, Cultural and Ecological Flows**

The Hopi Tribe re-asserts a non-diversionary claim to protect the aesthetic, cultural, and ecological flows of the waters of Pasture Canyon and White Ruin Canyon Wash. The Hopi Tribe also re-asserts its claim for a non-diversionary water right for instream flows in the lower Little Colorado River.[9] The Hopi Tribe

[9] The quantity of water needed to protect the aquatic, cultural and religious resources of the lower Little Colorado River are unknown at the present time.

supplements its claim for 294 acre-feet per year for riparian and wetland habitat in Pasture Canyon with an additional 16 acre-feet per year for White Ruin Canyon Wash (rounded). Please see Appendix 4 for a further explanation of the quantification of the White Ruin Canyon Wash claim.

3. **Cultural, Religious and Ceremonial Uses**

The Hopi Tribe is not supplementing its claim for Cultural, Religious and Ceremonial Uses. Please see the Hopi Tribe's Third Amended Statement of Claimant for this claim.

H. **Reservation of Rights for Lands Not Included in HSR**

The Hopi Tribe is not supplementing its reservation of right for lands not included in the HSR. Please see the Hopi Tribe's 3rd Amended SOC for this claim.

I. **Hopi Claims to Off-Reservation Water Supplies**

The Hopi Tribe is not supplementing its claim for off-reservation water supplies. Please see the Hopi Tribe's 3rd Amended SOC for this claim.

Respectfully submitted this 17th day of September, 2015.

Stevens Ecological Consulting LLC * P.O. Box 1315 * Flagstaff, AZ 86002

White Ruin Canyon Discharge Reconnaissance 14 August 2015: Preliminary Draft Report

Submitted by Lawrence E. Stevens, PhD
Stevens Ecological Consulting, LLC

Introduction

Larry Stevens, Principal of Stevens Ecological Consulting, LLC, and Abraham E. Springer, PhD, Geohydrologist at Northern Arizona University's School of Earth Sciences and Environmental Sustainability visited White Ruin Canyon with a Hopi Water Resources crew on 14 August 2015 to measure flow. Prior consultation with the Hopi Water Resources Department resulted in selection of a flow measurement site at the uppermost road into the canyon, where geologic structure was likely to release the maximum amount of groundwater. This location is at N 36.23692° W -110.58181°, at an elevation of approximately 1840 m.

We proceeded to that point, and measured flow at 10:55 a.m. (Fig. 1). Discharge was measured on a bedrock ledge near the downstream end of the wash adjacent to the springs emerging from several ciénegas on creek right. Discharge was measured with a leveled 1" Baski portable cut throat flume. Discharge from the creek was 7.7 gallons per minute (0.49 L/s). There is a possibility that 10 to 20 % more discharge may be passing this site, flow that was not measured by the flume. Thus, the total discharge at this site was likely up to 9.6 gallons per minute (0.59 L/s). The total annual discharge based on the measured and possible discharge discussed above would likely fall somewhere between 12.43 acre feet/ year and 15.54 ac-ft/ yr. Additional discharge measurements closer to the road crossing measured only about 60 % of the discharge measured at the first site, thus our assumption that the site selected represented the near-maximum discharge for the wash was supported.

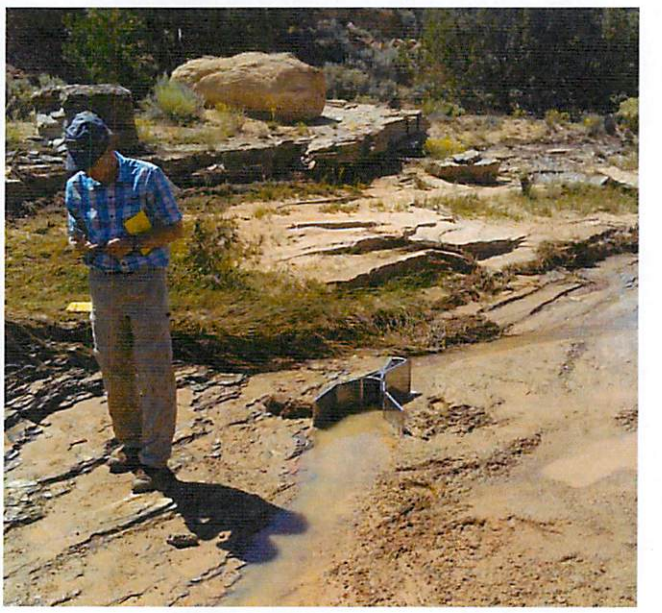

Fig. 1: The discharge measurement site in White Ruin Canyon, Hopi Indian Reservation.

The stream had undergone a recent, large flood about 4 feet in depth, related to the region's summer monsoon climate pattern; however, the stream had returned to its normal, low flow levels at the time of our visit. Such floods briefly transmit much (>3 orders of magnitude) instantaneous flow as compared to the near-baseflow measured here.

Other springs may exist downstream from the site where we measured flow. However, examination of Sweetwater Spring, ¼ mi downstream from the measurement site, revealed that it did not have sufficient flow to discharge into White Ruin Creek. The Hopi Water Resources staff indicated that additional flow downstream from Sweetwater Springs was not substantial, but further mapping and flow measurement of springs in this drainage are recommended.

The measurement point we used lies in the wash about 100 yd upstream from the road crossing. The channel nearby the measurement site is dominated by alluvium lying on top of bedrock, and away from bedrock exposures, the alluvium can transmit a significant amount of discharge through subsurface deposits. Therefore, flow measurements in the future should continue to be made in reaches of the channel where the subsurface alluvial flow is minimized by exposure of bedrock on the channel bed.
