Subject: Results of AGFD CAP Program Activities this past week in Region V

All,

An update regarding our activities from this past week.

We spent Tuesday in Redfield Canyon. Unfortunately, we collected 11 green sunfish, ranging in size from 60 to 100 mm. All of the sunfish were captured in one pool, upstream of Swamp Springs/Redfield confluence.

During our efforts in Redfield we detected 11 adult spikedeace and 1 adult loach minnow and two loach minnow in the 45-60mm range all within the 2010 stocking locations.

Wednesday, we collected 240 Gila topminnow from Cottonwood spring and Sonoita Creek proper.

The topminnow were transported to Bubbling Ponds Native Fish Conservation Facility and will be held there until mid/late fall.

Unfortunately, during the collection, tempering and transport process there were 75 topminnow mortalities.

If you have any questions about our activities in the past few days please let me know.

Thanks

-Clay

Subject: AGFD CAP Program Activities next week in Region V

All,

The CAP Program will be assisting TNC Muleshoe with the June Redfield green sunfish removal on Tuesday June 12th.

We'll be arriving at TNC Muleshoe HQ on Monday afternoon/evening and will be departing for Redfield Tuesday morning circa 0700.

Once we return from Redfield (depending on the time frame) we will either depart for Sonoita, AZ that night or early (circa 0600 hrs) the following morning.

We'll be arriving at Cottonwood Spring between mid-morning and noon on Wednesday. We'll be collecting topminnow from the spring as well as Sonoita Creek proper- if they are present there.

You all are welcome to join us in collecting Gila topminnow and please contact me via cell so we can coordinate logistics if you want to assist.

Thanks
