Subject Re: SPRNCA legal description

I left the acreage blank - I may have to get some guidance on what numbers to use. The GIS acres, I'm sure, will differ from the originals.

It looks pretty good, Jack. Was the acreage total at the end blank in the version that was submitted to WO back in '89? Will we have an updated number to insert now, along with the minor boundary changes? I suppose GIS does that readily.

Jim,

Here's the document after my first round of editing. If you have time, go through it for obvious errors. I still have to make changes in a couple of places.
