Reporting

Year	Report
FY 2005	Interim Certification of Offset

There are two types of reporting requirements for these funds:

1) Current Research Information System (CRIS) reporting is done on both a project and total program basis. Animal Health research projects are submitted for approval to CSREES by the state institutions. Each year the state institutions submit a program of research to the CRIS office listing all the approved Animal Health projects they will support with their current allocation of Animal Health funds. Each year the state institutions also submit to the CRIS office a progress report and an expenditure report for all the Animal Health projects they supported in the previous year.

2) Financial Reporting includes three types of reports: a) Certification of Offset (Form CSREES-2103) which is completed by the SAES's to certify that matching funds have been made available; b) SF-272, Federal Cash Transaction Report, which is submitted on a quarterly basis through the U.S. Department Health and Human Services' Payment Management System (DHHS-PMS); and c) SF-269, Financial Status Report, which is submitted on an annual basis to the Funds Management Branch by December 31st, for the reporting period of October 1st through September 30th.
