RE: Protest by Bureau of Indian Affairs acting Engineer Ralph Esquerra, on Water Application for permit to appropriate Water on the San Pedro River Watershed.

Dear Sirs:

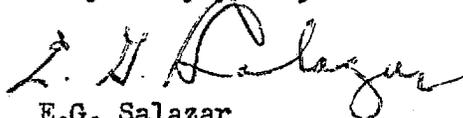

Regarding the protest on my water applications No. 33-84221, 33-84222 and 33-84223, made by the above mentioned, I do not feel there is grounds for protest regarding these applications.

The use of these waters began 100 years ago by our Indian ancestors, and have stayed within our family ever since. The waters have been used resourcefully and are vital to my cattle operation.

I feel what small amount of water utilized by my cattle would not adversely effect the San Carlos Irrigation Project, as stated in Mr. Esquerra's letter.

Thank you in advance for your assistance in this matter.

Very truly yours,

September 15, 1980

Arizona Water Commission

Re: Application No. 33-84222

Reference is made to Application No. 33-84222 filed by E. G. Salazar, Willcox, Arizona for permit to appropriate public water of the State of Arizona and/or construct a reservoir and store water for beneficial use. The source of the Water supply is Playa Draw tributary to Aravaipa Creek on the San Pedro watershed. Proposed use and amount applied for 1.0 acre feet per annum for stockwatering. Point of diversion within NE $\frac{1}{4}$  NW $\frac{1}{4}$  Section 26, of Township 6S, Range 18E, G&SRB&M, in the County of Pinal.

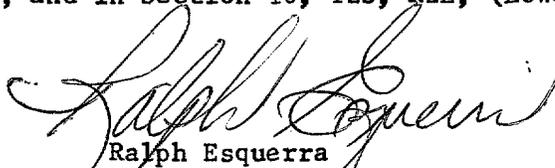

If this application is approved it would deprive the Indian and non-Indian water users of the San Carlos Irrigation Project, Bureau of Indian Affairs, water that has been used on certain of the Indian lands since time immemorial and on the non-Indian lands since as early as 1868. This is evidenced by the United States District Court in the Decree entered June 29, 1935 known as Globe Equity No. 59 (Gila Decree).

Waters of the Gila River and its tributaries have long been over appropriated and in most water years the irrigation water is in extremely short supply and much of the Project lands must remain idle because of the insufficient water supply.

It is believed that the approval of this application would result in the diminution of water of the Gila River and thus the rights of the San Carlos Irrigation Project water users would be adversely affected.

Waters of the Gila River and its tributaries are delivered directly to Project lands located in Townships 4, 5, 6 and 7 South, and Ranges 4, 5, 6, 7, 8, 9 and 10 East, and to reservation lands lying in Townships 1 and 2 South, Ranges 1 and 2 East. All such waters are delivered to the

described lands to the extent of all such water available. All deliveries are for irrigation purposes. The points of diversion are located in the NW¼ of Sec. 8, T4S, R11E (Ashurst Hayden Dam), near the SW Corner of Section 7, T4S, R7E, (Oldberg Dam); in Section 25, T2S, R2E, (Upper Gila Crossing Dam); and in Section 16, T2S, R2E, (Lower Gila Crossing Dam).

Re: Applications for Permit to Appropriate (Public) Water Nos.  
 33-84221, 33-84222 and 33-84223

Dear Mr. Salazar:

Per telephone conversation of last week, attached is a list of water filings in the name of E. G. Salazar; 24 in all.

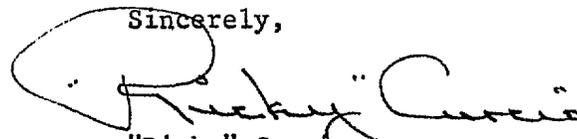

The subject of this letter is the referenced three applications, copies attached. After researching all your filings in the three different programs, I only see one duplicate filing, against 33-84222, and that is 38-83519 (copy attached) bearing a three-month earlier filing date than the 33-84222.

Since the State Land Department has also filed on Playa Tank (No. 38-88458), the course of action which would be in your best interests would be to perfect the referenced applications to Permit status. This department has resolved the protests by Bureau of Indian Affairs, San Carlos Irrigation Project against the referenced files. If you agree, and as we discussed, please write us a short letter referencing 33-84222 (only), giving us the capacity of the reservoir in acre feet, and permission to complete this application.

Upon receipt of the "reservoir capacity" for 33-84222, we will write to you requesting Permit fees for all three of the referenced applications at \$50.00 per application. When you receive the actual Permits, please return the short letter dated and signed requesting withdrawal of 38-83519.

Re: Applications to Appropriate Nos. 33-84221, 33-84222, 33-84223

Gentlemen:

On May 5, 1980, E.G. Salazar, made applications to appropriate water from the San Pedro Watershed for stockwatering use. The Bureau of Indian Affairs protested these applications.

This letter is to inform you that the Department of Water Resources has investigated the applications and found no indication that the proposed use will conflict with vested rights, be a menace to public safety, or be against the interest and welfare of the public. The Department is therefore proceeding to issue permits for the proposed use when applicable to do so. If the Bureau of Indian Affairs wishes to provide additional information supporting its protests, please notify us within thirty (30) days from the date of this letter.

The permits and certificates of water right, if later granted, will reflect that the use is subject to prior vested rights. Any future determination that the permitted use affects a vested right may require the applicant to cease or restrict the use of water.

Sincerely,

Dear Rosemary:

In response to your request for additional documentation on Certificate of Water Right No. 33-84222, I have enclosed a copy of the deed which transferred the interest in state leased property from E. G. Salazar to the Defenders of Wildlife Trust. Please note the site of this water right is on what was at the time of this transfer state land. I have also enclosed a fully executed Assignment of Water Right form from Salazar to Defenders of Wildlife Trust for this water right.

Regarding Stockpond No. 38-61136, please disregard the request to assign this water right made in my letter of 10 June 1988. It should not have been included since it is on property still owned by E. G. Salazar.

I have enclosed a check for \$495.00 to cover the assignment of the water rights referenced in my earlier letter with the exception of the above-mentioned stockpond.

If you have any questions please call me at 628-7576. Thank you for your assistance.

Sincerely yours,

  
Douglas Koppinger

**Suggestions for Completing Proof of Appropriation of Water Form**

This is the final report required of a holder of a permit to appropriate public waters. Upon approval of this report and the receipt of the proper fee the Department shall be ready to issue a Certificate of Water Right.

The Proof of Appropriation of Water is a series of statements of the appropriator, under oath, which are corroborated by the affidavits of two witnesses. This form should be filled in carefully, in a manner that will describe completely the project as actually constructed, giving the number of stock being watered and the quantity of water used under stockwatering permits; giving, in case of irrigation, the number of acres of land actually irrigated and the quantity of water used; and giving the full extent of use under appropriations for whatever other purposes. The practice of merely copying this information from the permit is not proper and should not be followed.

The affidavits must be made before a Notary Public or other officer qualified to administer oaths.

Dear Mr. Whittell:

Enclosed please find Assignment form and attachments with your check  
in the amount of \$500.00.

I am unable to process this assignment for the reason that there  
is no documentation of how the property where the water claim is  
located, went from being owned by E. G. Salazar to Defenders of  
wildlife. Under our initial review we find that Certificate of  
Water Right No. 33-84222 and Stockpond No. 38-61136 are both in the  
name of E. G. Salazar. This will require another assignment form  
to be completed which is enclosed.

Sincerely,
