	<u>PAGE</u>
LIST OF ACRONYMS	ii
LIST OF TABLES	iii
LIST OF FIGURES	iii
REFERENCES	v
APPENDICES	v
CHAPTER 1: INTRODUCTION	1-1
1.1 BACKGROUND	1-1
1.2 HISTORY OF PROCEEDINGS.....	1-2
1.2.1 <i>Southwest Cotton</i>	1-2
1.2.2 <i>Gila II</i>	1-3
1.2.3 1994 Subflow Order.....	1-4
1.2.4 <i>Gila IV</i>	1-5
1.2.5 Post <i>Gila IV</i>	1-6
1.3 SCOPE OF REPORT.....	1-6
1.4 NOTICE AND OBJECTIONS	1-7
CHAPTER 2: SUBFLOW ZONE CRITERIA	2-1
2.1 HYDROLOGIC CRITERIA.....	2-1
2.2 GEOLOGIC CRITERIA.....	2-3
2.3 HYDROGEOLOGIC CRITERIA	2-4
CHAPTER 3: HYDROLOGIC ANALYSIS	3-1
3.1 HYDROLOGIC SETTING	3-1
3.1.1 Topography	3-1
3.1.2 Streamflow Patterns	3-2
3.1.3 Natural Streamflow Depletions.....	3-4
3.1.4 Cultural Streamflow Depletions	3-4
3.2 EARLY EVIDENCE OF PREDEVELOPMENT STREAMFLOWS.....	3-5
3.2.1 Historic Accounts.....	3-6
3.2.2 Historic Irrigation Ditch and Ore Mill Diversions.....	3-7
3.2.3 Historic Streamflow and Diversion Measurements	3-10
3.2.4 1935 Aerial Photographs.....	3-12
3.2.5 Published Predevelopment Streamflow Maps	3-14
3.3 RECENT EVIDENCE OF PREDEVELOPMENT STREAMFLOWS.....	3-15
3.3.1 Instream Flow Claims	3-16
3.3.2 Wet/Dry Surveys.....	3-17

	<u>PAGE</u>
3.3.3	Recent Streamflow and Diversions Measurements 3-17
3.3.4	Published Recent Streamflow Maps 3-17
3.4	PREDEVELOPMENT PERENNIAL AND INTERMITTENT STREAM REACHES..... 3-18
3.4.1	San Pedro River 3-19
3.4.2	Babocomari River 3-21
3.4.3	Aravaipa Creek 3-22
CHAPTER 4:	GEOLOGIC ANALYSIS 4-1
4.1	GEOLOGIC SETTING 4-1
4.1.1	San Pedro River 4-1
4.1.2	Babocomari River 4-4
4.1.3	Aravaipa Creek 4-5
4.2	MAPPING METHODS 4-6
4.2.1	Strategy 4-7
4.2.2	Criteria 4-7
4.2.3	Review of Existing Data Sources 4-8
4.2.4	Field Work 4-9
4.2.5	Identification of Geologic Units and Contacts..... 4-9
4.2.6	Determination and Designation of Unit Ages..... 4-10
4.3	EXTENT OF FLOODPLAIN HOLOCENE ALLUVIUM..... 4-11
CHAPTER 5:	HYDROGEOLOGIC ANALYSIS 5-1
CHAPTER 6:	SUBFLOW ZONE DELINEATIONS 6-1

ACRONYMS

ADEQ	Arizona Department of Environmental Quality
ADWR	Arizona Department of Water Resources
afd	acre feet per day
AGFD	Arizona Game and Fish Department
ASA	Arizona State Archives
AZGS	Arizona Geological Survey
BLM	Bureau of Land Management
cfs	cubic feet per second
DEM	digital elevation model
ESRI	Environmental Research Institute
ET	evapotranspiration
GIS	Geographic Information System
GLO	General Land Office
GPS	Global Positioning System

HSR	Hydrographic Survey Report
mi ²	square miles
NAD27	North American Datum of 1927
NAD83	North American Datum of 1983
NCDC	National Climatic Data Center
NOA	Notice of Appropriation
NPS	National Park Service
NRCS	National Resource Conservation Service
SCS	Soil Conservation Service
SES	Soil Erosion Service
SGO	Surveyor General's Office
SPRNCA	San Pedro Riparian National Conservation Area
SRIMP	Statewide Riparian Inventory and Mapping Project
TNC	The Nature Conservancy
USFS	United States Forest Service
USGS	United States Geological Survey
UTM	Universal Transverse Mercator
WFR	Watershed File Report

TABLES

(follow tab)

Table 3-1	Historic Accounts of Streamflow Conditions
Table 3-2	Early Streamflow Records from Gaging Stations
Table 3-3	Early Canal Diversions
Table 3-4	Instream Flow Claims
Table 3-5	Recent Streamflow Records from Gaging Stations
Table 4-1	Archeological Age Data for Floodplain Holocene Alluvium
Table 4-2	AZGS Map Units Used by ADWR to Define Generalized Geologic Units

FIGURES

(follow tab)

Figure 1-1	Location of the San Pedro River Watershed
Figure 1-2	Map of Effluent Dominated Reaches and Potential Perennial and Intermittent Mountain Front Streams
Figure 2-1	Diagrams of Perennial and Intermittent Streamflow Conditions
Figure 3-1	Geographic Features in the San Pedro River Watershed
Figure 3-2	Change in Frequency of San Pedro River Streamflows Since the 1920s
Figure 3-3	Approximate Number of New Irrigation Diversions in the San Pedro River Watershed from 1866-1912

- Figure 3-4 Acreage of Irrigated Lands in the San Pedro River Watershed from 1881-1990
- Figure 3-5 Quantity of Underground Water Withdrawn from Wells and Mines in the Sierra Vista and Sonoran Portions of the Upper San Pedro Basin from 1903-2002
- Figure 3-6 Historic Accounts of Streamflow Conditions
- Figure 3-7 Location of Historic Irrigation Ditch Diversions and Ore Mills
- Figure 3-8 Location of Gaging Stations
- Figure 3-9 Benson Canal Diversions and Upstream San Pedro River Flows During 1926
- Figure 3-10 Stage measurements at Boquillas Dam on the San Pedro River During 1912
- Figure 3-11 Location of Early Seepage Runs
- Figure 3-12 Cumulative Diversions from the San Pedro River in March 1899
- Figure 3-13 San Pedro River Streamflows and Cumulative Diversions in March 1921
- Figure 3-14 Examples of Streamflow Conditions Inferred from Fairchild Photographs
- Figure 3-15 Summary of Streamflow Conditions Inferred from Fairchild Photographs
- Figure 3-16 Published Maps of Major Predevelopment Perennial Stream Reaches
- Figure 3-17 Locations of Instream Flow Claims
- Figure 3-18 Recent Wet/Dry Surveys
- Figure 3-19 Published Maps of Major Recent Perennial and Intermittent Stream Reaches
- Figure 3-20 Legend for Figures 3-21 through 3-23
- Figure 3-21a Comparison of Evidence for Predevelopment Streamflow Conditions Along the San Pedro River, Sierra Vista Subwatershed
- Figure 3-21b Comparison of Evidence for Predevelopment Streamflow Conditions Along the San Pedro River, Benson Subwatershed
- Figure 3-21c Comparison of Evidence for Predevelopment Streamflow Conditions Along the San Pedro River, Redington Subwatershed
- Figure 3-21d Comparison of Evidence for Predevelopment Streamflow Conditions Along the San Pedro River, Winkelman Subwatershed
- Figure 3-22 Comparison of Evidence for Predevelopment Streamflow Conditions Along the Babocomari River
- Figure 3-23 Comparison of Evidence for Predevelopment Streamflow Conditions Along Aravaipa Creek
- Figure 4-1 Generalized Cross Section of Stream Terraces and Piedmont Deposits Flanking the San Pedro River
- Figure 4-2 Recent Ground Photographs of the San Pedro River
- Figure 4-3 Recent Ground Photographs of the Babocomari River
- Figure 4-4 Recent Ground Photographs of Aravaipa Creek
- Figure 4-5 Geology Maps Reviewed by AZGS
- Figure 4-6 Location of AZGS Map Sheets and Figures
- Figure 4-7 Generalized Geologic Units in the San Pedro River Watershed
- Figure 4-8 Example Map of Generalized Geologic Units
- Figure 4-9 Examples of Isolated Deposits of Floodplain Holocene Alluvium Mapped Near Floodplain

- Figure 5-1 Examples Where Floodplain Holocene Alluvium Not Mapped or Setback Width is Greater
- Figure 5-2 Reaches Where Setbacks Not Applied by ADWR Due to Other Geologic Units in Floodplain
- Figure 6-1 Subflow Zone Along Major Streams in the San Pedro River Watershed

APPENDICES

(follow tab)

APPENDIX A: RELEVANT COURT DOCUMENTS

- A-1 1994 Subflow Order
- A-2 *Gila IV*
- A-3 2004 Subflow Decision
- A-4 2005 Subflow Order

APPENDIX B: HYDROLOGIC INFORMATION

- B-1 Analysis of Locational Data
- B-2 Historic Irrigation Ditches and Ore Mills
 - Tables
 - Figures
- B-3 Annual Hydrographs
 - Text
 - Figures
- B-4 Historic Winter Precipitation and Storm Runoff Analysis
 - Text
 - Tables
 - Figures

APPENDIX C: AZGS DOCUMENTS

- C-1 2009 Report of Findings
- C-2 Contract with ADWR
 - 2007 Contract
 - 2008 Contract Amendment
- C-3 Field Data
 - Tables
 - Maps
 - Photos
- C-4 Field Trip Guides

- San Pedro River
 - Babocomari River
 - Aravaipa Creek
 - Northern San Pedro River
- C-5 Strip Maps
- Map Sheets 1 through 6

APPENDIX D: ADWR GEOLOGY MAPS

- D-1 Generalized Surficial Geology along Streams
- Index Map
 - Quad Maps
- D-2 Disturbed Areas Mapped Within and/or Bordering Floodplain Holocene Alluvium
- Index Map
 - Quad Maps
- D-3 Lateral Extent of Floodplain Holocene Alluvium and Setbacks for Side Recharge
- Index Map
 - Quad Maps
- D-4 Holocene Tributary Alluvium Within and Bordering Floodplain
- Text
 - Maps

APPENDIX E: SUBFLOW ZONE MAPS

- E-1 Index Map
- E-2 Quad Maps
