INTRODUCTION

The Hydrographic Survey Report (HSR) for the San Pedro River watershed is part of the process to conduct a general adjudication of the Gila River System and Source. This is the first watershed HSR to be published for the Gila River adjudication.

Due to the relatively large number of water uses occurring within the San Pedro River watershed, this report has been divided into nine separate volumes. They are entitled:

1. General Assessment
2. Comprehensive Indices
3. Sierra Vista Subwatershed Watershed File Reports
4. Benson Subwatershed Watershed File Reports
5. Redington Subwatershed Watershed File Reports
6. Winkelman and Aravaipa Subwatersheds Watershed File Reports
7. Zone 2 Well Reports (formerly Wells Subject to Federal Claims)
8. Catalogued Wells
9. Maps of Water Uses

Volume 1, the General Assessment, describes the nature of the adjudication proceeding, the hydrologic evaluation of the water supply, water uses (natural and cultural) and their relationship, the determination of wells which are located in Zones 1, 2, or 3 as directed by the Court, investigation criteria employed by the Arizona Department of Water Resources (DWR), the results of the investigations for major water users and non-Indian federal reserved rights claims, and the quantification procedures utilized by DWR to estimate the amount of each user's water use.

Volume 2, the Comprehensive Indices, contains nine different indices which can be used to seek information about a water use or readily locate a watershed file report of interest by: the land owner name, the type of use, the location of the use or the diversion, the apparent date of first use, the applicable adjudication filings, water rights decrees, or the water source for a water use.

Volumes 3 through 6, Watershed File Reports, contain the detailed investigation results of individual water uses and claims.

Volume 7, Zone 2 Well Reports, lists those wells that have the potential to diminish the water supply available to federal reservations.

Volume 8, Catalogued Wells, lists those wells that DWR has determined may not be subject to state surface water jurisdiction or may not be subject to claims made under federal law.

Volume 9 contains the maps of the water uses described in Volumes 3 through 6, and in Volume 7.

1.1 DESCRIPTION OF VOLUME 2

Volume 2 contains eleven sections:

1. A map showing the subwatersheds of the San Pedro River watershed.
2. An explanation of the nine indices contained in this volume.
3. An index relating land owner name to watershed file report number (Index 1).
4. An index relating watershed file report number to land owner name (Index 2).
5. An index relating to an adjudication statement of claimant to watershed file report number and to land owner name (Index 3).
6. An index relating potential water right (PWR) locations to land owner name (Index 4).
7. An index relating location of diversions to land owner name (Index 5).
8. An index relating drainage area/water source name to potential water rights and to land owner name (Index 6).
9. An index relating drainage area/water source name to diversions and to land owner name (Index 7).
10. An index relating apparent dates of first use to potential water rights and to land owner name (Index 8).
11. An index relating previous water rights filings to watershed file report number and to land owner name (Index 9).

Figure 1 is a map showing the subwatersheds of the San Pedro River watershed and the HSR volumes (3, 4, 5, and 6) that contain watershed file reports within these subwatersheds.

The Explanation of Indices section is a discussion of each of the nine indices. Sample indices are shown and each field is discussed in detail. Other types of indices not covered in this volume can be made available by DWR upon request.

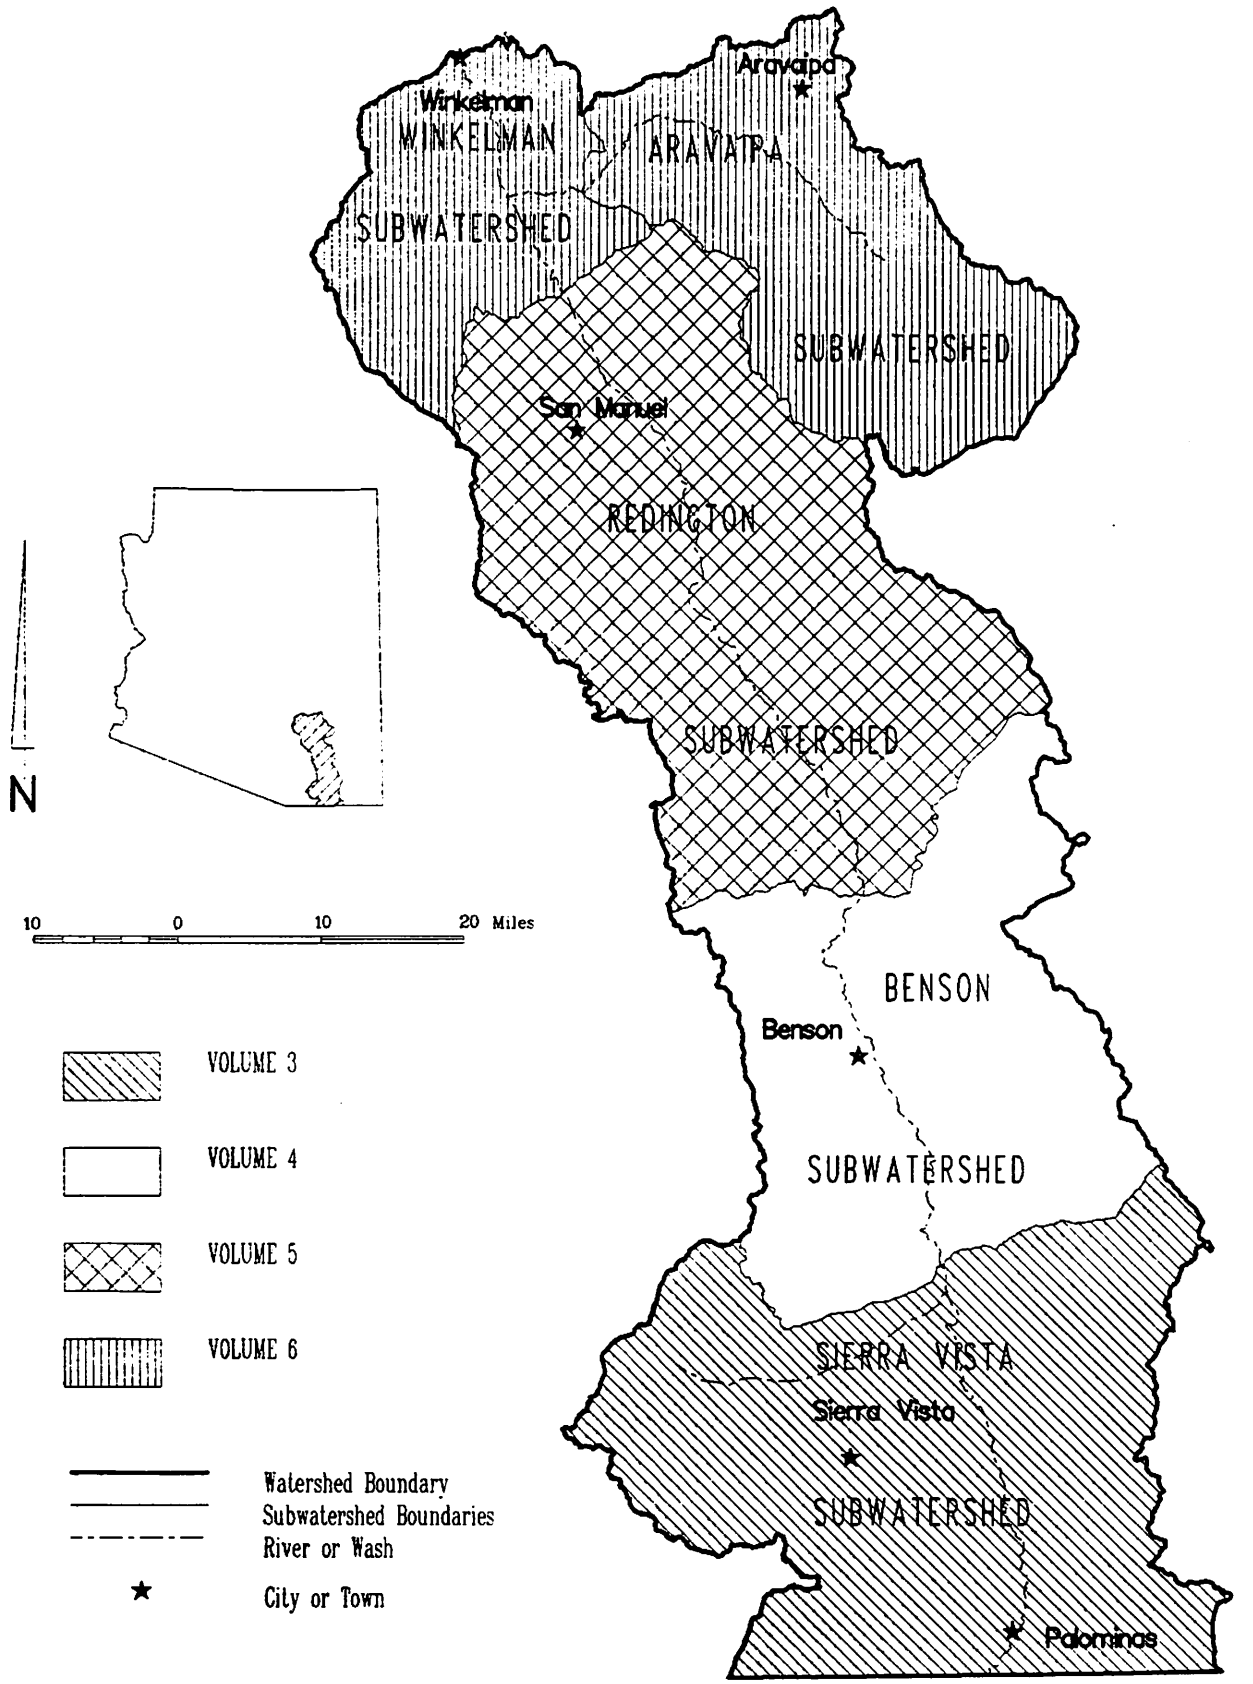

Figure 1. Map showing the San Pedro River watershed and the HSR volumes pertaining to each subwatershed.

1.2 EXPLANATION OF INDICES

Volumes 3 through 6 contain the investigation reports which display the results of DWR's identification of all water uses within a watershed. The data contained in these reports are all water rights claims and factual information such as land ownership, water source, location of diversions and water uses, apparent dates of first use, etc., which are pertinent to the identified water uses. The data may be used by the court and master in the determination of the extent and priority of water right.

DWR has developed nine indices which can be used to readily locate those watershed file reports containing specific information of interest such as: all reports containing a water rights decree or all reports having surface water sources within the Aravaipa Creek drainage area. The following are the nine comprehensive indices:

Index 1 - Owner Name/Watershed File Report Number

Index 2 - Watershed File Report Number/Owner Name

Index 3 - Statement of Claimant Number/Watershed File Report Number/Owner Name

Index 4 - Potential Water Right Location/Complete Potential Water Right Number/Owner Name

Index 5 - Point of Diversion Location/Complete Point of Diversion Number/Owner Name

Index 6 - Drainage Area/Water Source Name/Complete Potential Water Right Number/Owner Name

Index 7 - Drainage Area/Water Source Name/Complete Point of Diversion Number/Owner Name

Index 8 - Apparent Date of First Use/Complete Potential Water Right Number/Owner Name

Index 9 - Previous Filing Number/Watershed File Report Number/Owner Name.

The table format of the indices and watershed file reports requires the use of abbreviations. Table 1 lists these abbreviations in the same order in which they appear and are used in the HSR.

TABLE 1
LIST OF ABBREVIATIONS

APPLICABLE FILINGS AND DECREES(1)

Filing Number and Prefix

- 10 - Notices of water appropriation filed before the enactment of the State Water Code in 1919
- 20 - Court decree
- 3R, 4A, 33 - Application to appropriate public water, permits and certificates of water rights
- 36 - Water rights registrations filed pursuant to the Water Rights Registration Act of 1974
- 38 - Registration of stockponds filed pursuant to the Registration of Stockponds Act of 1977
- 39 - Statement of claimant filed for this adjudication proceeding pursuant to the General Adjudication Statutes (A.R.S. § 45-251 to A.R.S. § 45-260)
- 0 - Water rights filings made prior to the 1919 State Water Code which included notice of posting or notice of intent to appropriate public water
- C - Water rights filings which claimed rights established prior to the 1919 State Water Code but did not contain proof of filing

DIVERSIONS(1)

Diversion Prefixes

- D - Diversion Dam or Facility
- P - Instream Pump
- S - Spring
- W - Well

USES(1)

Potential Water Right Prefixes

- DM - Domestic
- DV - Diversion
- ID - Industrial/Commercial
- IR - Agricultural Irrigation
- MI - Mining
- MU - Municipal
- OT - Other Irrigation
- PR - Power
- RC - Recreational Irrigation
- SW - Stockwatering
- WL - Wildlife

RESERVOIRS(1)

Reservoir Types

- PS - Primary Storage
- SP - Stockpond
- SR - Small Reservoir

(1)These same prefixes are also used in the SHARED USES AND DIVERSIONS, PWR SUMMARY, QUANTITIES OF USE, and EXPLANATION sections of the watershed file report, and in the Zone 2 Well Reports (Volume 7) and Catalogued Wells (Volume 8) volumes.

The following explanations discuss each type of index in detail. A series of example indices have also been prepared which contain data similar in nature to the indices they represent.

OWNER NAME/WATERSHED FILE REPORT NUMBER (INDEX #1)

EXAMPLE COMPREHENSIVE INDEX #1
OWNER NAME/WATERSHED FILE REPORT NUMBER

(A) NAME (OWNER OR LESSEE/ALLOTTEE)	(B) WATERSHED FILE REPORT NUMBER	(C) SUBWATERSHED	VOLUME	(D) TABLE -PAGE
ADAMS, JOHN C.	112-15-300	BENSON	4	2-20
BAKER, A.	114-01-AAA-001	WINKELMAN	6	2-25
JONES, A.D.	113-04-AAA-001	REDINGTON	5	2-58
SMITH, J.E.	111-20-AAA-001	SIERRA VISTA	3	2-30
WASHINGTON, G.	115-05-AAA-001	ARAVAIPA	6	4-240

A. - NAME (OWNER OR LESSEE/ALLOTTEE) - The owner of record according to the county assessor records at the time of the investigation for privately owned land or according to the appropriate management agency for public land. The land owners for this index are arranged alphabetically by surname.

B. - WATERSHED FILE REPORT NUMBER - A unique number assigned to water use(s) and/or water rights claim(s) which occur in a specific geographic area held under one land owner or one lessee/allottee. The watershed file report number is comprised of three or four fields each separated by a dash (-). The combination of all the fields represents a unique location for the water use or claimed right.

C. - SUBWATERSHED - The San Pedro River watershed has been divided into five subwatersheds (Figure 1). The last number in the first field indicates the subwatershed. For example, 111 would indicate the San Pedro River watershed (11) and the Sierra Vista subwatershed (1). The subwatersheds and their numbers are listed below:

1 - Sierra Vista subwatershed
2 - Benson subwatershed
3 - Redington subwatershed
4 - Winkelman subwatershed
5 - Aravaipa subwatershed

D. - VOLUME-TABLE-PAGE - The HSR volume and corresponding table and page number in which a watershed file report can be found.

In the example, JOHN C. ADAMS is the land owner assigned to watershed file report number 112-15-300, which can be found in HSR Volume 4, Table 2, page 20. The watershed file report number indicates the San Pedro River watershed (11), Benson subwatershed (2), region 15, file number 300.

114-01-AAA-001	BAKER, A.	WINKELMAN	6	2-25
115-05-AAA-001	WASHINGTON, G.	ARAVAIPA	6	4-240

A. - WATERSHED FILE REPORT NUMBER - A unique number assigned to water use(s) and/or water right(s) claims. The watershed file report numbers are listed numerically (and alphabetically for those files containing alpha characters) for this index.

B. - OWNER NAME - The name of the land owner or lessee/allottee of record.

C. - SUBWATERSHED - The subwatershed in which the watershed file report is located.

D. - VOLUME-TABLE-PAGE - The HSR volume, table, and page in which the watershed file report can be located.

In the example, watershed file report number 112-15-300 has been assigned to JOHN C. ADAMS. This watershed file report can be found in HSR Volume 4, Table 2, page 20.

39-0000104	112-17-AAA-001	SMITH, K.P.	BENSON	4	2-657

A. - STATEMENT OF CLAIMANT NO. - The adjudication statement of claimant number that DWR has matched to a water use. The statement of claimant numbers are listed in ascending numerical order for this index.

B., C., D., and E. - The watershed file report number to which the statement of claimant has been assigned, the land owner name, the subwatershed, and the HSR volume, table, and page in which the watershed file report and statement of claimant can be located.

In the example, statement of claimant number 39-0000100 has been matched to water use(s) found on land owned by G. WASHINGTON. This watershed file report can be found in HSR Volume 6, Table 4, page 240.

NESESW	09	200S	180E	112-15-300-SP003	ADAMS, JOHN C.	4	2-20

A. - LOCATION (SUBDIV, SEC, TWNP, RNGE) - The legal location of the potential water right (PWR) described by the section-township-range system. The "SUBDIV" is a division of a section of land in which the water use(s) is/are located. The "SEC" is the section of land in which the water use(s) is/are located. "TWNP" and "RNGE" are the township and range of the Gila and Salt River Baseline and Meridian in which the water use(s) is/are located.

In the example, line 1 shows a location of NENENE 25 050S 150E, which is read as the northeast one-quarter of the northeast one-quarter of the northeast one-quarter of Section 25, Township 5 South, Range 15 East of the Gila and Salt River Base and Meridian. The last zero in the township and range numbers is used for one-half townships and ranges, and a decimal place is implied. This combination of subdivision-section-township-range describes an area of land approximately ten acres in size.

For this index, the locations are listed starting with the lowest geographic section-township-range found in the watershed.

B. - COMPLETE POTENTIAL WATER RIGHT NUMBER - This four to five field number fully describes the PWR as assigned by DWR during its investigations of water uses in the watershed. The first three to four fields describe the watershed file report number in which the PWR is located. The last field is the PWR number given to the type of water use found by DWR.

In the example, line 1 has a complete PWR number of 114-01-AAA-001-DM001. The number 114-01-AAA-001 designates the watershed file report number in which the PWR is located. "DM001" indicates that one domestic use (DM) was found on the land described by the location of NENENE 25 050S 150E.

C. - OWNER NAME - The name of the land owner or lessee/allottee of record. A. BAKER has been assigned the watershed file report in which the PWR "DM001" is found.

D. - VOLUME-TABLE-PAGE - The HSR volume, table, and page in which the watershed file report can be located.

A. - LOCATION - The legal location of the point of diversion or water source described by the section-township-range system.

B. - COMPLETE POINT OF DIVERSION NUMBER - This four to five field number fully designates the point of diversion or water source which supplies the water use(s) found by DWR. The first three to four fields indicates the watershed file report number where the point of diversion is located. The last field is the point of diversion number for the type of diversion found by DWR.

In line 1 of the example, the number 114-01-AAA-001-W06 describes a well "W06" which is a water source for PWRs located in watershed file report number 114-01-AAA-001.

C. - OWNER NAME - The name of the land owner or lessee/allottee of record. A. BAKER has been assigned the watershed file report in which the diversion "W06" is found.

D. - VOLUME-TABLE-PAGE - The HSR volume, table, and page in which the watershed file report can be located.

GROUNDWATER: ZONE 2	112-17-AAA-002-IR002	SMITH, K.P.	4	2-657

A. - WATER SOURCE NAME AND CLASSIFICATION - The Court has directed DWR to report all water uses supplied by surface water sources which include surface streamflow, springs, or seeps. DWR has delineated several major drainages as surface water sources for the San Pedro River watershed. These drainages are shown in Figure 2 and listed below:

SAN PEDRO RIVER
BABOCOMARI RIVER
ARAVAIPA CREEK

For water uses supplied by underground water withdrawn by wells, DWR has established three reporting zones for wells following the directives of the Court's Order dated September 9, 1988 pertaining to groundwater and surface water interrelationships. Section 4.6, Chapter 4 of Volume 1 of the HSR describes in detail DWR's technical interpretation of the Court's directives and the methodology used to implement them. The three zones are described as follows.

"Zone 1" delineates the area in which water withdrawn from wells is considered, for the purposes of the HSR, to be pumping appropriable subflow according to the criteria provided by the Court's order. The criteria of the Court's order are as follows:

1. As to wells located in or close to that younger alluvium, the volume of stream depletion would reach 50 percent or more of the total volume pumped during one growing season

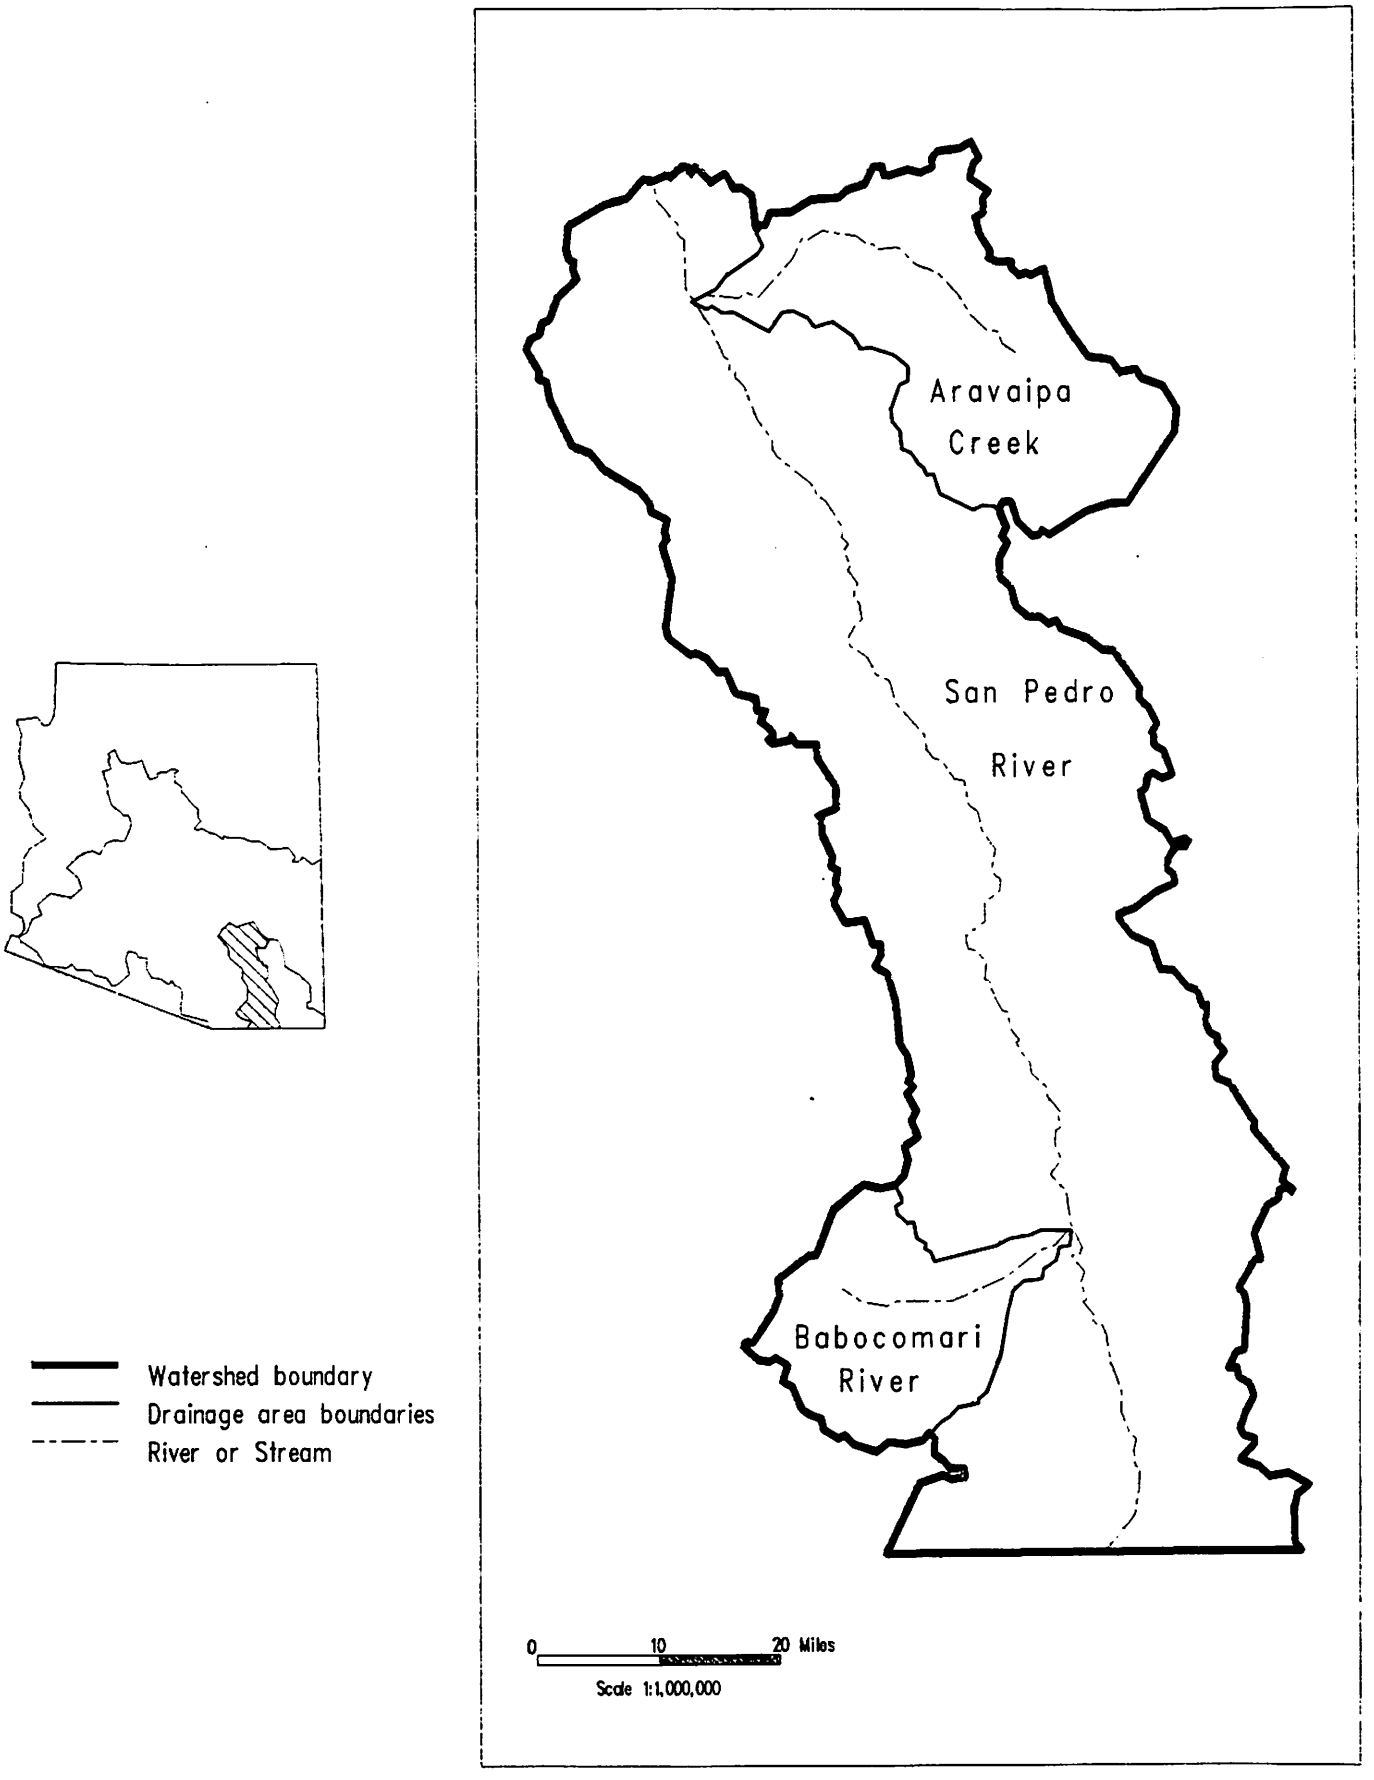

Figure 2. Map of the drainage areas of the San Pedro River watershed.

for agricultural wells or during a typical cycle of pumpage for industrial, municipal, mining, or other uses, assuming all instances and for all types of use that the period of withdrawal is equivalent to 90 days of continuous pumping for purposes of technical calculation.

2. A well is designated on state records as an in lieu well. This statement means that a well is pumping groundwater to replace a surface water source.

3. A well is designated by state certification as pumping surface flow.

The limits of this area has been designated by DWR as the "brightlines" in the HSR and underground water withdrawn by wells located in this zone is classified as "GROUNDWATER: ZONE 1."

"Zone 2" describes an area in which wells (supplying uses other than stockwatering, domestic, or irrigation of less than two acres) have the potential to diminish the sources of supply (surface and/or groundwater) available to satisfy federal reserved water right claims. The Court's order states the following:

> In determining a prioritization of such claimed federal reserved right, it will be necessary to determine all stream users or diversions of either surface water or groundwater which affect those sources reasonably on, at, or near the federal parcel which would be available to fulfill the determined entitlement.

Earlier in the order, it is also stated that:

> Because each subwatershed is to an extent different and the downstream location of federal and Indian reserved surface rights is different as compared to where upstream goundwater pumpers are located, it may be necessary to hold factual and evidentiary hearings to establish the parameters of what constitutes a significant diminishment of water rights within such time frame as would affect the United States ability to carry out the primary purpose of the reservation or federally reserved lands. (Emphasis added)

A well located in Zone 2 will be classified and reported as "GROUNDWATER: ZONE 2."

"Zone 3" is an area in which underground water withdrawn from wells has been determined to have no significant effect on diminishing the water supply available to satisfy water rights claimed or established under either state or federal water law. Wells located in Zone 3 and the exempted wells in Zone 2 are classified and reported as "GROUNDWATER: CATALOGUED."

B. - COMPLETE POTENTIAL WATER RIGHT NUMBER - The number which fully describes a PWR.

C. - OWNER NAME - The name of the land owner or lessee/allottee of record.

D. - VOLUME-TABLE-PAGE - The HSR volume, table, and page in which the watershed file report can be located.

In the example, line 1, PWR "SP001" (a stockpond) is located within the ARAVAIPA CREEK drainage area and is found in watershed file number 115-05-AAA-001. This watershed file report has been assigned to land owner G. WASHINGTON and the watershed file report can be found in HSR Volume 6, Table 4, page 240. On line 6, PWR "IR001" (agricultural irrigation) has as its source a well located within GROUNDWATER: ZONE 1 and is found in watershed file report number 111-20-AAA-001. This watershed file report has been assigned to land owner J.E. Smith and it can be located in HSR Volume 3, Table 2, page 30.

GROUNDWATER: ZONE 2	112-17-AAA-002-W01	SMITH, K.P.	4	2-657

A. - WATER SOURCE NAME AND CLASSIFICATION - The water source name and its classification of the diversion is indicated.

B. - COMPLETE POINT OF DIVERSION NUMBER - The number which fully describes the point of diversion.

C. - OWNER NAME - The name of the land owner or lessee/allottee of record.

D. - VOLUME-TABLE-PAGE - The HSR volume, table, and page in which the watershed file report can be located.

In the example, line 1, the number 115-05-AAA-001-D07 describes a surface water diversion "D07" which is located in the ARAVAIPA CREEK drainage area. The diversion is located on land owned by G. WASHINGTON. This watershed file report can be found in HSR Volume 6, Table 4, page 240. One line 6, a well "W01" is located within GROUNDWATER: ZONE 2 and is found in watershed file report number 112-17-AAA-002. This watershed file report can be located in HSR Volume 6, Table 2, page 57.

A. - APPARENT DATE OF FIRST USE - The "APPARENT DATE OF FIRST USE" is DWR's assessment of the date of first continuous beneficial water use based on its investigations. The dates are listed in ascending numerical order for this index.

B. - COMPLETE POTENTIAL WATER RIGHT NUMBER - The number which fully describes the PWR.

C. - OWNER NAME - The name of the land owner or lessee/allottee of record.

D. - VOLUME-TABLE-PAGE - The HSR volume, table, and page in which the watershed file report can be located.

In the example, line 1, PWR "SW002" (stockwatering) has been given an apparent date of first use of 1867. This stockwatering PWR can be found in

watershed file report number 115-05-AAA-001 which is assigned to G. WASHINGTON on whose land "SW002" is located. This watershed file report is located in HSR Volume 6, Table 4, page 240.

A. - **PREVIOUS FILING NUMBER** - A previous filing for a water right claim that has been assigned to water uses found in a watershed file report. The filings are listed in ascending numerical order for this index. The previous filings have the prefixes of 10, 20, 3R, 33, 36, 38, 39, 4A, "0," or "C."

B. - **WATERSHED FILE REPORT NUMBER** - A unique number assigned to water use(s) and/or water rights claim(s).

C. - **OWNER NAME** - The name of the land owner or lessee/allottee of record.

D. - **VOLUME-TABLE-PAGE** - The HSR volume, table, and page in which the watershed file report can be found.

In the example, previous filing number 20-0000002 indicates a decreed right has been found to apply to water uses and/or diversions on land owned by J.E. SMITH. This decree or right can be found in watershed file report number 113-04-AAA-001 located in HSR Volume 3, Table 2, page 30.
