Arizona Department of Water Resources is seeking public input on long-term water management planning for the Prescott Active Management Area

Phoenix (August 16, 2012) – The Arizona Department of Water Resources is seeking public input on the Fourth Management Plan (Plan) for the Prescott Active Management Area. The Plan describes historical water supply and demand for the area, and will also identify water demand and supply issues and possible future water management directions. As in the previous management plans, the Plan will also include conservation requirements for agricultural, municipal, and industrial water users. The goal of the Plan is to help ensure that sufficient water supplies are available for current and future water users in the AMA.

The Groundwater Users Advisory Council for the Prescott Active Management Area is hosting an open house workshop for residents of the Prescott Active Management Area on Wednesday, August 22, 2012, at the Yavapai County Administrative Office in the Supervisors Board Room. Doors will open at 6:00 p.m. and the workshop will end at 8:00 p.m. The purpose of this open house workshop is to provide an opportunity for residents of the Prescott Active Management Area to obtain information on the following:

- Water sources and historical water demand and supply of the Prescott AMA
- The development process and timeline of the Fourth Management Plan
- Water Conservation Resources
- Groundwater Modeling Data for the Prescott AMA

There will not be formal presentations given at this event; this is an opportunity for residents to become educated on water resources for the Prescott AMA, and submit comments on the management plan, and also speak with the members of the Groundwater Users Advisory Council for the Prescott AMA and staff from the Arizona Department of Water Resources.
