

**Water Resources Development Commission
Environmental Work Group**

Objective 1: Compile and Consider Projected Water Needs of Each County and Groundwater Basin over the Study Period of the Commission

Evaluate environmental considerations for Objective 1

1. Identify current environmental resources (This task will be done using current information and pulling it together. Additional information will be identified for research and studies.)
Environmental Resources – Water, Riparian, Wildlife, and Recreation
 - A. Catalog water resources (springs, streams, rivers, lakes, etc.)
 - B. Catalog riparian areas.
 - C. Catalog wildlife.
 - D. Catalog recreation
 - E. Catalog other resources identified by the Work Group.

2. Identify current water designated for environmental resources.

3. Identify conditions necessary to support them
 - A. With cataloging, identify water sources and any unique characteristic for that water sources.
 - B. Other tasks identified by the Work Group

4. Prepare summary of findings and recommendations including needed studies and research by February 28, 2011.
