**Source:** BOR 2007

**Notes:**

- <sup>1</sup> It should be noted that the reported consumptive use for individual users may not cover an entire 5 year period, the average is based on the years of record.
- <sup>2</sup> In 2003, the United States Bureau of Reclamation (Reclamation) began deducting unmeasured return flows from the diversions by individual divertors. Prior to this time, Reclamation only deducted the total amount of unmeasured return flow from the total Lower Basin diversions.
- <sup>3</sup> The Havasu National Wildlife Refuge spans an area that is located in the Lake Mohave, Lake Havasu, and Sacramento Valley basins. The consumptive use has been prorated based on the percentage of the Refuge land area in each basin.
- <sup>4</sup> The Central Arizona Project diverts water out of Lake Havasu (located in the Bill Williams Basin) for multiple uses in Maricopa, Pinal, and Pima counties.
