If you want to send me (via e-mail or CD or other) the digital images taken during this event, I'll be willing to burn them all onto CDs and send them out to at least the agency leads for this project.

I'll echo Doug's thanks to all involved!

Jeremy

Subject: Aravaipa fish release

I wanted to thank everyone that had a hand in the release of Gila topminnow and desert pupfish on TNC & BLM on the Aravaipa south rim. It isn't often enough that we get to take part in conservation successes, but the times we do help sustain us to keep working for natural resources!

I have been the FWS topminnow lead for almost 11 years, and have only been involved in releases of topminnow into three other sites during that time. We doubled that in one day! Many other potential release sites are in various stages of planning. Hopefully, efforts such as yesterdays helps grease the skids to keep the other projects moving forward.

Thanks again for the opportunity to take part, and thanks from the fish!!

Fish going into Cement....
