Rebecca

My ease in getting electronic journal articles is through the MSU library. The papers you cite below are not in journals. I'm attaching Adar's 1984 dissertation which cites the 1981 paper. Two are publications of the Water Resource Research Center and I'll inquire there if they have electronic versions. The report to George Whittel may be hard to find.

Duncan,

You mentioned you might have access to journal resources that we might have difficulty obtaining. Clearly Adar has done some pivotal research related to hydrology in Aravaipa. Mark Haberstick indicated that Adar 1983 is one TNC uses regularly when relating issues of hydrology in Aravaipa. Mark only has a paper copy. If you could assist by locating the following documents in electronic format, we would be most grateful.

Arad, A. and **E. Adar** (1981). "Water balance study in the upper Aravaipa watershed, Arizona." University of Arizona, Water Resources Research Center, Publication No. 206, 19 p.

Adar, E. (1983). "Estimation of recharge in a small southern Arizona basin by means of hydrological, hydrochemical and environmental isotopes data." University of Arizona, Water Resources Research Center, 134 p.

Adar, E. 1983. Pattern of recharge and discharge in Aravaipa valley, Arizona. Report to the George Whittell Wildlife Preserve.

Adar, E. 1984. Quantification of aquifer recharge distribution using environmental isotopes and regional hydrochemistry. Ph.D. dissertation, University of Arizona, Tucson.

In the meantime, I'll be working on looking for other research and papers that might be of interest.

Thanks,
Rebecca
