Subject: RE: Aravaipa expert reports and upcoming disclosure

Rebecca

I'm resending this email as it contains the only reference of mine (a new one) that is not included in the disclosure... see attached Mahoney and Rood 1998. Unless of course, there are some somewhere else in the disclosure that I missed and that have my name with them. I assume the cluster with my name is the only set of references tied to my report.

Duncan

Rebecca

I've tweaked the report and added a figure from Bob's report replacing one of mine. Also, passed the buck on sediment and geomorphology to Bob's report. I've added a reference (Mahoney and Rood) and will attach here with my near final.

I believe I've sent you all other references in the past. Right?? Can you check or should I look back to old emails?

10 am AZ (11 am MT) Wednesday October 16 works for me.

Duncan
