

TYPE 2 NON-IRRIGATION GRANDFATHERED RIGHTS INFORMATION SHEET

This is a supplement for the Type 2 Non-Irrigation Grandfathered Rights (Type 2s) List in your local Active Management Area (AMA).

Please note that there are three types of Type 2 rights: Non-Irrigation, Mineral Extraction, and Power Generation. Non-Irrigation Type 2s may be used for any non-irrigation purpose, but Mineral Extraction Type 2s can be used only for Mineral Extraction, and Power Generation Type 2s can be used only for Power Generation.

Type 2s can be leased in portion, but can only be bought or sold for their entire allotment amounts.

Below is a brief description of the components found in the document. All the data is from the Department of Water Resources' (the Department) Registry of Grandfathered Rights.

Right Number: The Certificate of Type 2 right reference number, as assigned by the Department

Primary Owner Name: The owner name to which correspondence is sent from ADWR. It is possible to have more than one owner of a Type 2

Type 2 Leases:

Yes – all or a portion of the Type 2 has historically or is currently being leased

No – has never been involved with a lease

This does not mean that a right with a NO *will not* lease, just that it has never been leased

Owner address and phone: self-explanatory

Year: the Annual Water Withdrawal and Use Report year

Allotment Qty: The annual withdrawal authority. The maximum amount of groundwater that may be withdrawn pursuant to the right, in acre feet

Total Use: The amount of groundwater used in that particular year pursuant to the Type 2

Unused: The quantity of the withdrawal authority that went unused that year
(*Allotment Qty - Total Use = Unused*)
