2007 NOTICE OF INTENT APPLICATION REVIEW AND WELL FILE MAINTENANCE REPORT

May 23, 2008

Volume I: Statewide data broken down by county.

This report includes an account of the number of applications to drill (NOID), abandon (NOIA), late registration and reissued drilling authorities received and issued by the Arizona Department of Water Resources (Department) during calendar year 2007. Changes of well information and well record updates are also noted on the report.

Contents:

- * **Section A:** Monthly breakdown of NOI related activity, e.g., Notice of Intent Unit (NOI), electronic filing (eNOI), Water Quality (WQ) and Active Management Area (AMA) application processing, issuance of A.R.S. § 45-454(C) exemptions, and logging well file updates.
- * **Section B:** Snapshot of NOID and NOIA receipt and issuance showing statewide monthly and annual totals listed by county.
- * **Section C:** Well construction estimates. Well/water use distribution as reported on NOID applications received by the Department. Report includes statewide monthly and annual totals listed by county.
- * **Section D:** Distribution of proposed locations for new exempt wells as reported on NOIDs received by the Department during the calendar year. Report includes statewide monthly and annual totals listed by county.

Query Considerations:

- * No wells from the well registration no. 55-700000 series are captured in the queries, as this is a separate area of WELLS55 used by the Water Quality Unit (WQ) to assign tracking numbers for administrative purposes only.
- * NOID applications received were queried by application date, as this is the starting point for other comparison queries. Well registration no. 55-400000 series wells were subtracted from the applications and added into the late registration figures, as these wells are being late registered for the purpose of being abandoned (they are also counted as abandonments). The 55-800000 series wells are also not included in this query, as these are late registrations that will remain active.
- * Section A, lines 1 (*NOIDs rec'd by NOI*) and 15 (*NOIAs received*) represent all NOIs received in the NOI Unit, including those processed by eNOI and WQ, as they are all reviewed by NOI staff. The NOI application review determines whether routing will include WQ and forwards the NOIs as needed; applications processed through eNOI must still be checked to ensure accuracy and clarify any questionable aspects evident in the information gathered online. Lines 2 & 3, and 16 & 17 breakdown the data for applications processed via eNOI and WQ. Applications to drill non-exempt wells inside AMAs that are processed within the AMAs are not included in these figures. They are tracked separately on lines 13 & 14. The two graphs at the end of the section illustrate the NOI/eNOI/WQ ratio of applications received (data on wells processed by the AMAs is not included in the graphs).

- * All queries were completed using Oracle Browser and ADWR databases *Well Registry* and *Well Actions History*. Both current action codes and action history codes were included in the resulting data. The *Comments* field was used to identify who processed the application (NOI, WQ, eNOI or the AMA).
- * It must be noted that the process of querying data in WELLS55 does not result in absolute final numbers. The database is updated daily, and data entry and the process of manually extracting data leaves room for fluctuation and potential errors.
- * These queries represent statewide activity. There were no '0' or 'N' indicators in the county code section of WELLS55 for this time period, and the few that had the county 'blank' were in initial receipt status (they were so new the information hadn't been fully keyed into the system yet). The 'blank' county well applications were pulled, the cadastral information was reviewed and the applications were added into the appropriate counties.
- * In some of the query parameters it is noted (for example), "only considered well registration no. 55-900000 series" or "subtracted well registration no. 55-800000 series," etc. The indication that a certain well number series was excluded or exclusively used applies to the current well applications in that series (evident by the well number, application date and other associated well data). There are wells from the 55-800000 and 55-900000 series that are being modified, deepened or replaced or are otherwise rightly included in the query. These wells are identifiable and were not affected.

Example: eNOI well numbers issued in January 2007 were in the 55-906200 – 55-908300 range. If well registration no. 55-900111 was listed as having an action history code 550 dated January 2007, the well would not be considered with the current eNOIs on lines 2 and 5, as it is obviously a modification, deepening or replacement (current eNOIs are processed the same day they are filed and mod/deepen/replace requests are not accepted electronically; this well registration number establishes the original application to drill was not initially filed in January 2007, and even though a change of driller may occur somewhat later than the application date, the drilling authority would be expired on a registration number this low; additionally, non-exempt wells inside AMAs may not be filed electronically, so the well isn't from this category either). The *Comments* field will identify whether the application was processed by NOI or WQ.

VOLUME I; SECTION A

Monthly breakdown of NOI related activity, e.g., Notice of Intent (NOI), electronic filing (eNOI), Water Quality (WQ) and Active Management Areas (AMA) application processing, issuance of A.R.S. § 45-454(C) exemptions authorized, and logging well file updates. Information is listed by county, and the last table is an annual summary.

Section A includes a pie chart comparing the number of NOIDs, NOIAs, late registrations and change of driller requests received by the NOI Unit, and two bar graphs showing NOIDs and NOIAs received by NOI, eNOI and WQARF individually during 2007. NOIDs processed by the AMAs are not included in the chart and graphs, as they aren't filed through the NOI Unit and are a totally separate process. The information reported in lines 13 (*AMA Non-ex Rec'd*) and 14 (*AMA Non-ex Issued*) is included for comparison purposes only, as the AMAs manage specific data relative to these wells and are responsible for its official dissemination.

NOIAs and late registrations are processed through the NOI Unit (by NOI, eNOI or WQ), not the AMAs. All change of driller requests including those processed by the AMAs are accounted for in lines 23 and 24 (these are reissued drill cards subject to fee assessment but not to licensing time frames).

A.R.S. § 45-454(C) establishes a regulatory framework for the location of certain exempt wells within AMAs. In some circumstances, the Department may issue an exemption from this requirement pursuant to A.R.S. § 45-454(D) or (F). Lines 7 – 12 are exemptions issued by the Department during the calendar year. The exemptions are:

A.R.S. § 45-454(D):

On request from the owner of the land on which an exempt well is prohibited pursuant to subsection C of this section on a form prescribed by the director, the director shall issue an exemption from subsection C of this section if the landowner demonstrates to the satisfaction of the director that any of the following applies:

- (D.1) 1. The landowner submitted a written request for service to the municipal provider that operates the distribution system and the municipal provider did not provide written verification to the landowner within thirty calendar days after receipt of the request that water service is available to the landowner after payment of any applicable fee to the municipal provider.
- (D.2) 2. The total capital cost and fees for connecting to the operating water distribution system exceed the total capital cost and fees for drilling and fully equipping an exempt well.
- (D.3) 3. If the applicant must obtain an easement across other land to connect to the water distribution system of the municipal provider, the applicant sent the owner of the land a request for the easement by certified mail, return receipt requested, and either the applicant did not receive a response to the request within thirty calendar days of mailing the request or the request was denied.
- (D.4) 4. The landowner does not qualify for an exemption pursuant to paragraphs 1, 2 or 3 of this subsection and the landowner provides written verification from the municipal provider that the landowner shall not receive or request water service from the municipal provider while the exempt well is operational. The exemption for that well is revoked if the landowner or any subsequent landowner receives water service from the municipal provider. In determining whether to approve or reject a permit application filed under section 45-599, the director shall not consider any impacts the proposed well may have on an exempt well drilled pursuant to this paragraph.

A.R.S. § 45-454(F):

A remediation well drilled for the purpose of remediating groundwater is exempt from this section if it meets one of the following:

- (F.1) 1. The remediation well is for an approved Department of Environmental Quality or United States Environmental Protection Agency remediation program.
- (F.2) 2. A registered geologist certifies that the remediation well is for the purpose of remediation.

The table in Section A was developed as follows:

Line(s)	Description	Query Parameters
1	<i>NOIDS Rec by NOI.</i> Notices of Intent to Drill (NOID) received in the NOI Unit.	Application date by county, by month; not including well registration series 55-400000 and 800000; plus current action and action history codes 160 and 165.
2	<i>Filed by eNOI.</i> Applications included in line 1 received through the electronic filing (eNOI) process.	Query used for line 1, only considering well registration no. 55-900000 series.
3	<i>Sent to WQ.</i> Applications included in line 1 determined to be for wells located within known areas of contamination and that, under certain circumstances, are subject to WQ review.	Current action and action history code 866 compared to the application query from line 1 (some of the 866's are NOIAs).
4	<i>Issued by NOI.</i> Drilling authorities issued by the NOI Unit.	Current and action history codes 550, only considering NOI staff initials indicated in the <i>Comments</i> field.
5	<i>Issued by eNOI.</i> Drilling authorities issued electronically.	Same as line 4, considering the eNOI indicator in the <i>Comments</i> field rather than NOI staff initials.
6	<i>Issued by WQ.</i> Drilling authorities issued by the WQ Unit.	Same as line 4, considering only WQ staff initials in the <i>Comments</i> field rather than NOI staff initials.
7 - 12	<i>Exempt D1 through F2.</i> Number of exempt wells drilled pursuant to A.R.S. §§ 45-454(D) & (F). (1190 exemptions)	Current action and action history codes 901 through 906.
13	<i>AMA Non-ex Rec'd.</i> NOID applications to drill non-exempt wells inside AMAs. These NOIs are submitted directly to the AMAs.	Application date query used for line 1, counting only well types N, P, S, F, Q and T located within AMAs.
14	<i>AMA Non-ex Issued.</i> NOID authorizations issued to drill non-exempt wells inside AMAs issued by the AMAs.	Same query and methodology used for lines 4 – 6, considering only well types N, P, S, F, Q and T located within AMAs.
15	<i>NOIAs Received.</i> Notices of Intent to Abandon (NOIA) received in the NOI Unit.	Current action and action history code 175 plus eNOI 560 (eNOI only auto-inserts 560 action codes, not 175 for abandonments).

Line(s)	Description	Query Parameters
16	<i>Filed by eNOI.</i> Number of NOIAs from line 15 that were received through eNOI (only allowed for geotechnical and mineral exploration wells, all other abandonments must be filed manually).	Same query used for line 15, considering only new well registration no. 55-900000 series wells.
17	<i>Sent to WQ.</i> Number of NOIAs from line 15 that were determined subject to WQ review and routed accordingly.	Current action and action history code 866 compared to the received NOIA query used for line 15 (some of the 866's are NOIDs).
18	<i>Issued by NOI.</i> NOIA authorities issued by the NOI Unit.	Current action and action history code 560 considering only NOI staff initials noted in the <i>Comments</i> field.
19	<i>Issued by eNOI.</i> NOIA authorities issued electronically (drill & fill, i.e., geotechnical and mineral exploration only).	Same as line 18, considering the eNOI indicator in the comments field rather than NOI staff initials.
20	<i>Issued by WQ.</i> NOIA authorities issued by the WQ Unit.	Same as line 18, considering only WQ staff initials noted in the <i>Comments</i> field rather than NOI staff initials.
21	<i>Late Reg Received.</i> Applications to register wells constructed prior to the Code that are not already on record with the Department.	Current action and action history code 100 (55-800000 series) plus well registration no. 55-400000 series wells based on application date.
22	<i>Late Reg Issued.</i> Applications from line 21 that have been approved and added to the well registry.	Current action and action history code 101 (55-800000 series) plus well registration no. 55-400000 series wells based on application date.
23	<i>Ch Driller Rec'd.</i> All change of driller requests received by the Department except the AMAs. When a change of driller is received after the original drilling authority has been issued, a reissued drill card is generated.	Current action and action history code 865 minus those with AMA staff initials in the <i>Comments</i> field.
24	<i>Ch Driller Issued.</i> Change of driller requests authorized by the NOI Unit and the WQ Unit.	Current action and action history code 869 and wells identified in the query used for line 23 (865 code) identified as having been coded 555 rather than 869 in error.
25	<i>Other 55-71As.</i> Change of Well Information requests other than change of driller. These generally don't require a reissuance, just an update to the well record.	Current action and action history codes 850, 855, 856, 858, 860 and 861.
26	<i>Reports.</i> Drill reports, completion reports, reports of well capping, abandonment completion reports, etc. that result in updates to the well file.	Current action and action history codes 750, 800, 802, 805, 815 and 820.

2007 STATEWIDE FILING OF NOTICE OF INTENT TO DRILL APPLICATIONS DISTRIBUTED TO NOI, eNOI AND WQ FOR PROCESSING

2007 STATEWIDE FILING OF NOTICE OF INTENT TO ABANDON APPLICATIONS DISTRIBUTED TO NOI, eNOI AND WQ FOR PROCESSING

2007 NOI STATEWIDE APPLICATION AND MAINTENANCE REVIEW DISTRIBUTION

VOLUME I; SECTION B

Snapshot of NOIDs and NOIAs received and issued showing statewide monthly and annual totals for each county. This chart lists only the total number of applications received and authorities issued without NOI/eNOI/WQ data broken out individually. Applications received and processed in the AMAs are not included.

Section B includes two graphs that compare the total annual number of applications to drill and to abandon wells received in each county during the calendar year.

Section B, NOIDs, was developed as follows:

Line(s)	Description	Query Parameters
1	<i>NOIDs Received.</i> Applications to drill received in each county during the calendar month indicated on the chart (last row is annual total).	Information listed in Section A, line 1.
2	<i>NOIDs Issued.</i> Applications to drill issued in each county during the calendar month indicated on the chart (last row is annual total).	Information listed in Section A, lines 4 – 6 added together.

Section B, NOIAs, was developed as follows:

Line(s)	Description	Query Parameters
1	<i>NOIAs Received.</i> Applications to abandon received in each county during the calendar month indicated on the chart (last row is annual total).	Information listed in Section A, line 15.
2	<i>NOIAs Issued.</i> Applications to abandon issued in each county during the calendar month indicated on the chart (last row is annual total).	Information listed in Section A, lines 18 – 20 added together.

2007 STATEWIDE FILING OF NOTICE OF INTENT TO DRILL APPLICATIONS TO BE REVIEWED BY NOI, eNOI AND WQ

2007 STATEWIDE FILING OF NOTICE OF INTENT TO ABANDON APPLICATIONS TO BE REVIEWED BY NOI, eNOI AND WQ

VOLUME I; SECTION C

Well/water use distribution as proposed on NOID applications received by the Department. Well/water use categories include domestic, stock, municipal/utility (water company), commercial/industrial, monitor/Piezometer/environmental, and exploration/specialty. The Report includes statewide monthly and annual totals for each county. Many wells have more than one designated use; therefore, these numbers may exceed the number of individual applications filed during the calendar year.

Section C includes a pie chart comparison of different well/water uses based on the annual statewide application data.

Figures are based solely on the filing of Notice of Intent to Drill (NOID) or Abandon (NOIA) forms or the filing of an Application for a Permit.

STATEWIDE WELL USE DISTRIBUTION REPORTED ON APPLICATIONS TO DRILL FILED IN 2007

VOLUME I; SECTION D

Exempt wells are those wells for which the Notice of Intent to Drill proposes a maximum pump capacity of 35 GPM. The exempt well query includes well types E (exempt), D (domestic stock exempt), and O (non-domestic exempt) and is based on the NOID application date (not confirmation that the well was in fact drilled). The query lists only new drills, not modifications or deepenings. Data is listed by county, by month followed by the annual total.

Section D includes a bar graph comparing the number of new exempt well applications received for each county during the calendar year. It does not include deepenings, modifications and late registrations of existing pre-code wells.

NEW EXEMPT WELL APPLICATIONS TO DRILL FILED IN EACH COUNTY IN 2007

2007 NOTICE OF INTENT APPLICATION REVIEW AND WELL FILE MAINTENANCE REPORT

May 23, 2008

Volume II: Activity within the five designated Active Management Areas (AMA) and the three designated Irrigation Non-Expansion Areas (INA).

This report includes an account of the number of applications to drill (NOID), abandon (NOIA), late registration and reissued drilling authorities received and issued within the AMAs/INAs by the Arizona Department of Water Resources (Department) during calendar year 2007. Changes of well information and well record updates are also noted on the report.

Contents:

- * **Section A:** Monthly breakdown of NOI related activity, e.g., NOI, electronic filing (eNOI), Water Quality (WQ) and Active Management Area (AMA) application processing, issuance of A.R.S. § 45-454(C) exemptions, and logging well file updates.
- * **Section B:** Snapshot of NOID and NOIA receipt and issuance within the AMAs/INAs, showing monthly and annual totals.
- * **Section C:** Well construction estimates. Well/water use distribution as reported on NOID applications received by the Department. Report includes monthly and annual totals for each AMA/INA.
- * **Section D:** Distribution of proposed locations for exempt wells as reported on NOIDs received by the Department during the calendar year. Report includes monthly and annual totals for each AMA/INA.

Query Considerations:

- * No wells from the well registration no. 55-700000 series are captured in the queries, as this is a separate area of WELLS55 used by the Water Quality Unit (WQ) to assign tracking numbers for administrative purposes only.
- * NOID applications received were queried by application date, as this is the starting point for other comparison queries. Well registration no. 55-400000 series wells were subtracted from the applications and added into the late registration figures, as these wells are being late registered for the purpose of being abandoned (they are also counted as abandonments). The 55-800000 series wells are also not included in this query, as these are the late registrations that will remain active.
- * Section A, lines 1 (NOIDs rec'd by NOI) and 15 (NOIAs received) represent all NOIs received in the NOI Unit, including those processed by eNOI and WQ, as they are all reviewed by NOI staff. The NOI application review determines whether routing will include WQ and forwards the NOIs as needed; applications processed through eNOI must still be checked to ensure accuracy and clarify any questionable aspects evident in the information gathered online. Lines 2 & 3, and 16 & 17 breakdown the data for applications processed via eNOI and WQ. Applications to drill non-exempt wells inside AMAs that are processed within the AMAs are not included in these figures, they are tracked separately on lines 13 & 14. The two graphs at the end of the section illustrate the NOI/eNOI/WQ ratio of applications received (data on wells processed by the AMAs is not included in the graphs).

- * All queries were completed using Oracle Browser and ADWR databases *Well Registry* and *Well Actions History*. Both current action codes and action history codes were included in the resulting data. The *Comments* field was used to identify who processed the application (NOI, WQ, eNOI or the AMA).
- * It must be noted that the process of querying data in WELLS55 does not result in absolute final numbers. The database is updated daily, and data entry and the process of manually extracting data leaves room for fluctuation and potential errors.
- * These queries represent activity within the designated AMAs/INAs only.
- * In some of the query parameters it is noted (for example), "only considered well registration no. 55-900000 series" or "subtracted well registration no. 55-800000 series," etc. The indication that a certain well number series was excluded or exclusively used applies to the current well applications in that series (evident by the well number, application date and other associated well data). There are wells from the 55-800000 and 55-900000 series that are being modified, deepened or replaced or are otherwise rightly included in the query. These wells are identifiable and were not affected.

Example: eNOI well numbers issued in January 2007 were in the 55-906200 – 55-908300 range. If well registration no. 55-900111 was listed as having an action history code 550 dated January 2007, the well would not be considered with the current eNOIs on lines 2 or 5, as it is obviously a modification, deepening or replacement (current eNOIs are processed the same day they are filed and mod/deepen/replace requests are not accepted electronically; this well registration number establishes the application to drill was not initially filed in January 2007, and even though a change of driller may occur somewhat later than the application date, the drilling authority would be expired on a registration number this low; additionally, non-exempt wells inside AMAs may not be filed electronically, so the well isn't from this category either). The Comments field will identify whether the application was processed by NOI or WQ.

VOLUME II; SECTION A

Monthly breakdown of NOI related activity, e.g., Notice of Intent (NOI), electronic filing (eNOI), Water Quality (WQ) and Active Management Areas (AMA) application processing, issuance of A.R.S. § 45-454(C) exemptions authorized, and logging well file updates. Information is listed by AMA/INA, and the last table is an annual summary.

Section A includes a pie chart comparing the number of NOIDs, NOIAs, late registrations and change of driller requests for wells inside AMAs/INAs received by the NOI Unit, and two bar graphs showing NOIDs and NOIAs received by NOI, eNOI and WQ individually during 2007 for activity within AMAs/INAs. NOIDs processed by the AMAs are not included in the chart and graphs, as they aren't filed through the NOI Unit and are a totally separate process. The information reported in lines 13 (AMA Non-ex Rec'd) and 14 (AMA Non-ex Issued) is included for comparison purposes only, as the AMAs manage specific data relative to these wells and are responsible for its official dissemination.

NOIAs and late registrations are processed through the NOI Unit (by NOI, eNOI or WQ), not the AMAs. All change of driller requests for wells inside AMAs, including those processed by the AMAs, are accounted for in lines 23 and 24 (these are reissued drill cards subject to fee assessment but not to licensing time frames).

A.R.S. § 45-454(C) establishes a regulatory framework for the location of certain exempt wells within AMAs. In some circumstances, the Department may issue an exemption from this requirement pursuant to A.R.S. § 45-454(D) or (F). Lines 7 – 12 are exemptions issued by the Department during the calendar year. The exemptions are:

A.R.S. § 45-454(D):

On request from the owner of the land on which an exempt well is prohibited pursuant to subsection C of this section on a form prescribed by the director, the director shall issue an exemption from subsection C of this section if the landowner demonstrates to the satisfaction of the director that any of the following applies:

- (D.1)* 1. The landowner submitted a written request for service to the municipal provider that operates the distribution system and the municipal provider did not provide written verification to the landowner within thirty calendar days after receipt of the request that water service is available to the landowner after payment of any applicable fee to the municipal provider.
- (D.2)* 2. The total capital cost and fees for connecting to the operating water distribution system exceed the total capital cost and fees for drilling and fully equipping an exempt well.
- (D.3)* 3. If the applicant must obtain an easement across other land to connect to the water distribution system of the municipal provider, the applicant sent the owner of the land a request for the easement by certified mail, return receipt requested, and either the applicant did not receive a response to the request within thirty calendar days of mailing the request or the request was denied.
- (D.4)* 4. The landowner does not qualify for an exemption pursuant to paragraphs 1, 2 or 3 of this subsection and the landowner provides written verification from the municipal provider that the landowner shall not receive or request water service from the municipal provider while the exempt well is operational. The exemption for that well is revoked if the landowner or any subsequent landowner receives water service from the municipal provider. In determining whether to approve or reject a permit application filed under section 45-599, the director shall not consider any impacts the proposed well may have on an exempt well drilled pursuant to this paragraph.

A.R.S. § 45-454(F):

A remediation well drilled for the purpose of remediating groundwater is exempt from this section if it meets one of the following:

- (F.1) 1. The remediation well is for an approved Department of Environmental Quality or United States Environmental Protection Agency remediation program.
- (F.2) 2. A registered geologist certifies that the remediation well is for the purpose of remediation.

The table in Section A was developed as follows:

Line(s)	Description	Query Parameters
1	<i>NOIDS Rec by NOI.</i> Notices of Intent to Drill (NOID) received in the NOI Unit.	Application date by AMA/INA, by month; not including well registration series 55-400000 and 800000; plus current action and action history codes 160 and 165.
2	<i>Filed by eNOI.</i> Applications included in line 1 received through the electronic filing (eNOI) process.	Query used for line 1, only considering well registration no. 55-900000 series.
3	<i>Sent to WQ.</i> Applications included in line 1 determined to be for wells located within known areas of contamination and that, under certain circumstances, are subject to WQ review.	Current action and action history code 866 compared to the application query from line 1 (some of the 866's are NOIAs).
4	<i>Issued by NOI.</i> Drilling authorities issued by the NOI Unit.	Current and action history codes 550, only considering NOI initials indicated in the <i>Comments</i> field.
5	<i>Issued by eNOI.</i> Drilling authorities issued electronically.	Same as line 4, considering the eNOI indicator in the <i>Comments</i> field rather than NOI staff initials.
6	<i>Issued by WQ.</i> Drilling authorities issued by the WQ Unit.	Same as line 4, considering only WQ staff initials in the <i>Comments</i> field rather than NOI staff initials.
7 - 12	<i>Exempt D1 through F2.</i> Number of exempt wells drilled pursuant to A.R.S. §§ 45-454(D) & (F). (1190 exemptions)	Current action and action history codes 901 through 906.
13	<i>AMA Non-ex Rec'd.</i> NOID applications to drill non-exempt wells inside AMAs. These NOIs are submitted directly to the AMAs.	Application date query used for line 1, counting only well types N, P, S, F, Q and T located within AMAs.
14	<i>AMA Non-ex Issued.</i> NOID authorizations issued to drill non-exempt wells inside AMAs issued by the AMAs.	Same query and methodology used for lines 4 – 6, considering only well types N, P, S, F, Q and T located within AMAs.
15	<i>NOIAs Received.</i> Notices of Intent to Abandon (NOIA) received in the NOI Unit.	Current action and action history code 175 plus eNOI 560 (eNOI only auto-inserts 560 action codes, not 175 for abandonments).

Line(s)	Description	Query Parameters
16	<i>Filed by eNOI.</i> Number of NOIAs from line 15 that were received through eNOI (only allowed for geotechnical and mineral exploration wells, all other abandonments must be filed manually).	Same query used for line 15, considering only well registration no. 55-900000 series wells.
17	<i>Sent to WQ.</i> Number of NOIAs from line 15 that were determined subject to WQ review and routed accordingly.	Current action and action history code 866 compared to the received NOIA query used for line 15 (some of the 866's are NOIDs).
18	<i>Issued by NOI.</i> NOIA authorities issued by the NOI Unit.	Current action and action history code 560 considering only NOI staff initials noted in the <i>Comments</i> field.
19	<i>Issued by eNOI.</i> NOIA authorities issued electronically (drill & fill, i.e., geotechnical and mineral exploration Only).	Same as line 18, considering the eNOI indicator in the <i>Comments</i> field rather than NOI staff initials.
20	<i>Issued by WQ.</i> NOIA authorities issued by the WQ Unit.	Same as line 18, considering only WQ staff initials noted in the <i>Comments</i> field rather than NOI staff initials.
21	<i>Late Reg Received.</i> Applications to register wells constructed prior to the Code that are not already on record with the Department.	Current action and action history code 100 (55-800000 series) plus well registration no. 55-400000 series wells based on application date.
22	<i>Late Reg Issued.</i> Applications from line 21 that have been approved and added to the well registry.	Current action and action history code 101 (55-800000 series) plus well registration no. 55-400000 series wells based on application date.
23	<i>Ch Driller Rec'd.</i> All change of driller requests received by the Department except the AMAs. When a change of driller is received after the original drilling authority has been issued, a reissued drill card is generated.	Current action and action history code 865 minus those with AMA staff initials in the <i>Comments</i> field.
24	<i>Ch Driller Issued.</i> Change of driller requests authorized by the NOI Unit and the WQ Unit.	Current action and action history code 869 and wells identified in the query used for line 23 (865 code) identified as having been coded 555 rather than 869 in error.
25	<i>Other 55-71As.</i> Change of Well Information requests other than change of driller. These generally don't require a reissuance, just an update to the well record.	Current action and action history codes 850, 855, 856, 858, 860 and 861.
26	<i>Reports.</i> Drill reports, completion reports, reports of well capping, abandonment completion reports, etc. that result in updates to the well file.	Current action and action history codes 750, 800, 802, 805, 815 and 820.

**2007 NOTICE OF INTENT TO DRILL APPLICATIONS FOR
WELLS LOCATED WITHIN THE ACTIVE MANAGEMENT AREAS &
IRRIGATION NON-EXPANSION AREAS DISTRIBUTED TO NOI, eNOI
AND WQ FOR PROCESSING**

**2007 NOTICE OF INTENT TO ABANDON APPLICATIONS FOR
WELLS LOCATED WITHIN ACTIVE MANAGEMENT AREAS &
IRRIGATION NON-EXPANSION AREAS DISTRIBUTED
TO NOI, eNOI AND WQ FOR PROCESSING**

**2007 NOI APPLICATION AND MAINTENANCE REVIEW
DISTRIBUTION FOR WELLS LOCATED WITHIN ACTIVE
MANAGEMENT AREAS & IRRIGATION
NON-EXPANSION AREAS**

VOLUME II; SECTION B

Snapshot of NOIDs and NOIAs received and issued showing AMA/INA monthly and annual totals. This chart lists only the total number of applications received and authorities issued without NOI/eNOI/WQ data broken out individually. Applications received and processed in the AMAs are not included.

Section B includes two graphs that compare the total annual number of applications to drill and to abandon wells received in each AMA/INA during the calendar year.

Section B, NOIDs, was developed as follows:

Line(s)	Description	Query Parameters
1	<i>NOIDs Received.</i> Applications to drill received in each AMA/INA during the calendar month indicated on the chart (last row is annual total).	Information listed in Section A, line 1.
2	<i>NOIDs Issued.</i> Applications to drill issued in each AMA/INA during the calendar month indicated on the chart (last row is annual total).	Information listed in Section A, lines 4 – 6 added together.

Section B, NOIAs, was developed as follows:

Line(s)	Description	Query Parameters
1	<i>NOIAs Received.</i> Applications to abandon received in each AMA/INA during the calendar month indicated on the chart (last row is annual total).	Information listed in Section A, line 15.
2	<i>NOIAs Issued.</i> Applications to abandon issued in each AMA/INA during the calendar month indicated on the chart (last row is annual total).	Information listed in Section A, lines 18 – 20 added together.

VOLUME II; SECTION C

Well/water use distribution as proposed on NOIDs for wells inside AMAs/INAs received by the Department. Water use categories include domestic, stock, municipal/utility (water company), commercial/industrial, monitor/Piezometer/environmental, and exploration/specialty. The report includes monthly and annual totals for each AMA/INA. Many wells have more than one designated use; therefore, these numbers may exceed the number of individual applications filed during the calendar year.

Section C includes a pie chart comparison of different well/water uses based on the annual application data for wells inside AMAs/INAs.

Figures are based solely on the filing of Notice of Intent to Drill (NOID) or Abandon (NOIA) forms or the filing of an Application for a Permit.

WELL USE DISTRIBUTION AS
REPORTED ON APPLICATIONS
TO DRILL FILED IN 2007**

VOLUME II; SECTION D

Exempt wells are those wells for which the Notice of Intent to Drill proposes a maximum pump capacity of 35 GPM. The exempt well query includes well types E (exempt), D (domestic stock exempt), and O (non-domestic exempt) and is based on the NOID application date (not confirmation that the well was in fact drilled). The query lists only new drills, not modifications or deepenings. Data is listed by AMA/INA, by month followed by the annual total.

Section D includes a bar graph comparing the number of new exempt well applications received for each AMA/INA during the calendar year. It does not include deepenings, modifications and late registrations of existing pre-code wells.
