Subj: APPOSE INA plans

June 1, 2015

To Docket Supervisor Sharon Scantlebury,

I'm sending this email to voice my opinion concerning the San Simon Sun-basin INA proposal. I APPOSE ANY REGULATION OF WATER WELLS.

If regulation is decided for the future, consider regulating only new wells on very large land areas.

If regulation is decided for the future, please consider the size of the land. A few 100 acres here and there are not going to impact the water supply. It's the very large land owners who might affect our future water supply.

If regulation is decided for the future, a thorough data analysis of present water wells should be considered before making a decision.

Thank you for your time.

Bernie Guzman
