

ATTACHMENT A

Identified below are common types of activities and investments made to prepare land for irrigation purposes. The boxes that are checked indicate the investments that were claimed in your application for an Irrigation Grandfathered Right, but no evidence or documentation was received to verify these claims.

Please provide the required information on this form for each investment checked. Attachment B specifically lists the information that is required for each type of investment. Any additional information that you feel would further support your claim, such as a Soil Conservation Service farm plan, should also be submitted.

Please understand that without this information, we will be unable to favorably consider your substantial capital investment claim and, as a result, unable to issue you a Certificate of Irrigation Grandfathered Right.

- o Other sources that support SCI Claim such as Land Sat or ASCS/SCS confirmation.

- o General Narrative that summarizes the SCI investigation.

During the prescribed SCI time frame Mr. [REDACTED] has invested over \$20,000.00 to subjugate his land for agricultural irrigation. During this time frame he has built a home, developed a hog operation and cleared and partially leveled approximately 80% of his land.

Mr. [REDACTED] works at the nuclear power plant and has been developing his farm in his free time as his finances permit.

The Phoenix AMA recommends that Mr. Gruel be issued an Irrigation Certificate on 26.8 acres of which 21.8 acres is based on SCI expenditures and 5.0 acres due to an irrigation history. The water duty should be based on alfalfa and bermuda pasture. Water duty acres should not exceed 26.0

[REDACTED]

September 13, 1981

State of Arizona
Department of Water Resources
P.O. Box 2600
Phoenix, Arizona, 85002

Dear Sir:

[REDACTED] hereby file for the Grandfather Water Rights for 26.8 acres. The "waterbuy" fee on this acreage has been paid from the beginning of R.I.D. Though the water available from this right to buy R.I.D. irrigation water has not been used on this land, it is the intent of the owners to further develop the acreage to accommodate irrigation

We have owned this land since January of 1972 and have constructed a home and hog farm. The layout of the structures and location of the domestic well, I think, indicate the intent to farm all acres included in the waterbuy from R.I.D in the future. To date 5 acres have been leveled and put in pasture with some efforts made at other locations on said acreage to level and clear land.
