---

Hopefully I'll be able to help out in Sept but you are right, we start getting extremely busy.

Did you guys use the backpack shockers for the sunfish removal and how were the water flows?

Di you see any sign of other folks being in the canyon?

thanks,

John Bacorn

John,

Sorry you couldn't make it out. It was a warm one! We removed roughly 25 green sunfish, although we haven't added up the total numbers yet.

We'll be back out there come Sept. to perform some additional monitoring in Hot Spring and Redfield, although I know that time of year will be busy for hunt stuff...

-Clay

Clayton,  
I had planned/wanted to go along on the June trip but I already had previous commitments to a sector meeting and other LE training that my supervisor will not let me get out of.

Hopefully next time.

All,

The CAP program will be assisting another TNC led effort to remove Greensunfish from Redfield Canyon.

We will be departing Phx HQ on Monday, June 21<sup>st</sup> and camp at the trailhead for Redfield Canyon.

The following morning we will hike into the canyon, set mini-hoopnets and electrofish.

We will be returning to Phoenix HQ on June 22<sup>nd</sup>.

If you have any questions please let me know, at this point we have enough assistance but extra hands are always welcome.
