**Subject:** RE: Aravaipa Aerials: 2010 NAIP

This past weekend I looked at the aerials Rebecca sent. The color 1978 aerials seem most useful. I compared one location with a 2010 Google Earth view (Google Earth has more recent but for that location it was not good). I'm attaching a comparison of a site outside the Wilderness but it allows one to make comparisons on riparian veg which seems not to have changed that much.

**Subject:** Aravaipa Aerials: 2010 NAIP

Included at the bottom of this email is a link to download 2010 aerial photography of Aravaipa Canyon. It is the NAIP 1m color imagery. As Duncan pointed out in an earlier email the imagery on GoogleEarth is also a good resource for viewing the riparian vegetation through the canyon. It is probably 2011 or 2012 and about ~1ft resolution.

If you have any questions about this or any of the aerial photography, give me a call.
