

Questions:

6-902 Maximum Annual Water Allotment Conservation Requirements

What restrictions are in place up to January 1st 2027? Can new dairies open up without restriction of use? What are the current restrictions if any and what would the restrictions be for a new business?

1. Calculate the average..... Will this ever be monitored by the state or always on good behavior or their word?

2. Will there ever be a maximum population for new or existing dairies or will they be able to continually increase their herds increasing water allotments along the way.

With the monthly calculator, what will stop dairy or feedlots from loading their herds at the end of the month to artificially inflate the water allotment numbers?

Additional allocation of water for dairy operation consistent with industry health and sanitation objections if it requires more than its maximum annual allotment: How will amounts be determined for health/sanitation and will the amount change monthly or be yearly based?

6-904 Monitoring and Reporting Requirements

1. How will monsoonal surface runoff water be measured or does it count in the equations?

6-002

C. Compliance with Maximum Annual Water Allotment

What happens when it exceeds allotment? How long before the heavy charges like misdemeanor (mentioned in text) kicks in. Is there a tiered process of prosecution? One of the biggest concerns is lack of enforcement.

6-1102 Conservation Requirements for Pre-2022 Metal Mining Facilities

B. Management of Pre-slimming/Interceptor Wells

Will there be a barrier between the tailings layer and soil surface? What will prevent failures like overtopping, weak foundations and liquefaction? Is there a maximum size for tailings impoundment? Will there be a required clearance check by an outside source like with septic "before" the tailings barrier is put to use?
