

Land Subsidence Rate in the Butler Valley Area, La Paz County
 Based on Radarsat-2 Satellite Interferometric Synthetic Aperture Radar (InSAR) Data
 Time Period of Analysis: 1.0 Years 03/31/2025 To 03/26/2026

© MDA 2025 - 2026

| Explanation | |
|---------------------------------|---------------------------------|
| 03/31/2025 To 03/26/2026 | |
| Land Subsidence Rate | |
| Decorrelation/No Data | Subsidence Feature |
| Greater 7 cm/yr (2.8 in/yr) | Hardrock |
| 5 - 7 cm/yr (2.0 - 2.8 in/yr) | Highways and Interstates |
| 3 - 5 cm/yr (1.2 - 2.0 in/yr) | Interstate |
| 2 - 3 cm/yr (0.8 - 1.2 in/yr) | US |
| 1 - 2 cm/yr (0.4 - 0.8 in/yr) | State |
| 0.5 - 1 cm/yr (0.2 - 0.4 in/yr) | Roads |
| 0 - 0.5 cm/yr (0 - 0.2 in/yr) | |

Decorrelation (white areas) are areas where the phase of the received satellite signal changed between satellite passes, causing the data to be unusable. This occurs in areas where the land surface has been disturbed (i.e. bodies of water, snow, agriculture areas, areas of development, etc).

Coordinate System: NAD 1983 UTM Zone 12N
 Projection: Transverse Mercator
 Datum: North American 1983
 Units: Meter
 Created: 4/10/2026
