

Notice

Lower Basin Drought Contingency Plan Arizona Implementation Steering Committee Meeting

November 8, 2018

Steering Committee Delegates and Alternates,

The discussions surrounding the intra-State DCP mitigation plan are fluid and moving toward a critical juncture.

When the Co-chairs scheduled the mitigation work group meeting for 1 p.m. Thursday, November 8, we anticipated that delegates who were working on comprehensive mitigation proposals would be ready to share them at the meeting for discussion and consideration.

We have been informed by certain parties that they need more time to refine their proposals and to discuss them with various stakeholder groups represented on the Steering Committee.

To that end, we believe that the best path forward is to give them that opportunity before holding another meeting. Therefore the November 8 meeting is cancelled.

When it becomes clear that the time is right to hold the next meeting, we will set a date and inform you.

Thank you for your patience and continued support of the process.

Feel free to reach out to the Chairs with questions or concerns.
