

July 20th, 2020 Agricultural Subgroup Meeting Questionnaire Responses

These are responses collected from a questionnaire distributed during the July 20, 2020, Agricultural Subgroup Meeting.

How should tiers in the Agricultural BMP Program be determined?

1 response

(*Note: Different colors are different responses)

Please provide any input you have regarding the Agricultural BMP Program tiers:

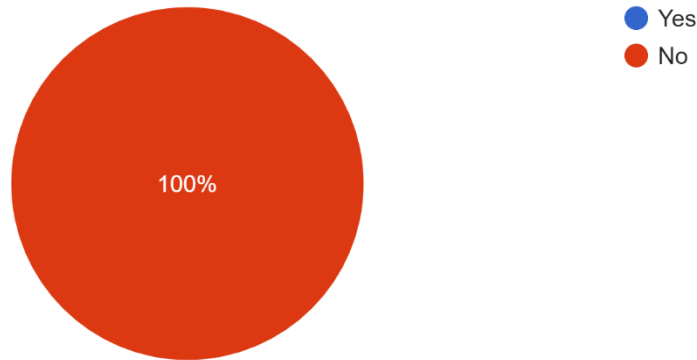

I apologize that this is my first time to attend a meeting. The presentation on Tiers was confusing to me. I could not get a grasp on the objectives or goals for the programs. Maybe if I had an understanding of how it is used on the C&I side then that would help me grasp what is being presented.

Do you have any ideas for improving the Agricultural BMP Program?

I hope to soon.

Would you support the inclusion of the "Integrated Farm Program" in the 5th Management Plans?

1 response

Please explain your answer here:

Not at this time. Too early in process to for me to make a decision either way.

Do you have any ideas for additional alternative agricultural conservation programs?

*No responses received

Where do you see the need for AMA customization?

Within the Sub-Basins. If the aggregate use in a sub-basin is decreasing why can't I increase my allotment on my IGFR by a similar amount within that sub-basin?

How can we improve these work group meetings?

The pandemic has made so many things difficult. I would hope that any final decisions regarding the 5th plan would be postponed until you can have in person meetings. This is very important to be sure all voices are heard and that all users fully understand the new plan.
