

Arizona Department of Water Resources,

I am a resident of the Douglas Water Basin.

Regarding our Douglas AMA, I request the following management goal:

“The management goal of the Douglas AMA is to
(achieve and maintain attempt to reach)...

- long-term stabilization of local water tables
- safe-yield (long-term balance between groundwater withdraw and recharge)
- a reduced rate of aquifer depletion, short of safe-yield

...within a timeframe of ASAP years,
and to...

- prioritize water rights for locally-residing water users,
- impose water use fees for non-locally-residing water users,
- limit non-exempt water rights for non-agricultural
commercial developments (urbanization),

indefinitely.”

The residents of the Douglas Basin value our autonomy and expect the ADWR to work cooperatively with us in the formation of any groundwater regulations, goals, and plans.

Arizona Department of Water Resources,

I am a resident of the Douglas Water Basin.

Regarding our Douglas AMA, I request the following management goal:

“The management goal of the Douglas AMA is to

achieve and maintain attempt to reach)...

long-term stabilization of local water tables

safe-yield (long-term balance between groundwater withdraw and recharge)

a reduced rate of aquifer depletion, short of safe-yield

...within a timeframe of 1 years,
and to...

prioritize water rights for locally-residing water users,

impose water use fees for non-locally-residing water users,

limit non-exempt water rights for non-agricultural
commercial developments (urbanization),

indefinitely.”

The residents of the Douglas Basin value our autonomy and expect the ADWR to work cooperatively with us in the formation of any groundwater regulations, goals, and plans.

Name Mckenzie Mason

Signature Mckenzie Mason

Date April 11th, 2023

Arizona Department of Water Resources,

I am a resident of the Douglas Water Basin.

Regarding our Douglas AMA, I request the following management goal:

“The management goal of the Douglas AMA is to
(achieve and maintain attempt to reach)...

- long-term stabilization of local water tables
- safe-yield (long-term balance between groundwater withdraw and recharge)
- a reduced rate of aquifer depletion, short of safe-yield

...within a timeframe of 20 years,
and to...

- prioritize water rights for locally-residing water users,
- impose water use fees for non-locally-residing water users,
- limit non-exempt water rights for non-agricultural
commercial developments (urbanization),

indefinitely.”

The residents of the Douglas Basin value our autonomy and expect the ADWR to work cooperatively with us in the formation of any groundwater regulations, goals, and plans.
