Dear ADWR Representative,

I'm a long-time resident of the Douglas Water Basin.

Regarding our Douglas AMA, I demand the following goals:

- To achieve and maintain safe yield—establish a long-term balance between groundwater withdrawal and recharge—in our Basin to achieve groundwater stabilization.
- To achieve safe yield within a timeframe of 25 years while protecting the welfare of farmers and ranchers residing in the Douglas Basin.
- To prioritize water rights for locally residing water users, impose water-use fees for investor-owned corporate water users from out of the area, and limit non-exempt water rights for nonagricultural commercial developments.
- To assure this management plan remains in place indefinitely.

The residents of the Douglas Basin value our autonomy and expect the ADWR to work cooperatively with us in the formation of any groundwater regulations, goals, and plans.

Name Lynn Gray
